Fiery Workflow Suite **CALENDAR 2018**

January to December 2018

Fiery Workflow Suite

Powerful, Modular, Integrated

Fiery® Workflow Suite has solutions for every stage in the print production process. Modular offerings let you choose what you need now and add more as you grow. You can integrate current production systems by centralizing control of print job management to make existing print assets more scalable and productive. Plus, Fiery Workflow Suite products integrate with each other, with other EFI products and with third-party solutions — for easy implementation, deployment and use.

Watch a video at
fiery.efi.com/FWS

Job Submission

Facilitate your customers sending jobs to you and enable operators to submit those jobs to the print engine with the correct specifications.

Prepress

Streamline and further automate print workflows to ensure integrity of jobs before going to print to reduce errors and waste.

Makeready

Reduce labor-intensive document preparation with easy-to-use tools in one visual interface.

Output Management

Improve digital print production capacity, turnaround and productivity by centralizing control of print job management across multiple production systems.

Processing

Fiery servers drive printers across all printing environments, deliver amazing precision, RIP with blazing speed, and produce perfect color every time.

Color

Guarantee accurate, consistent and reliable color reproduction at all times.

VDP

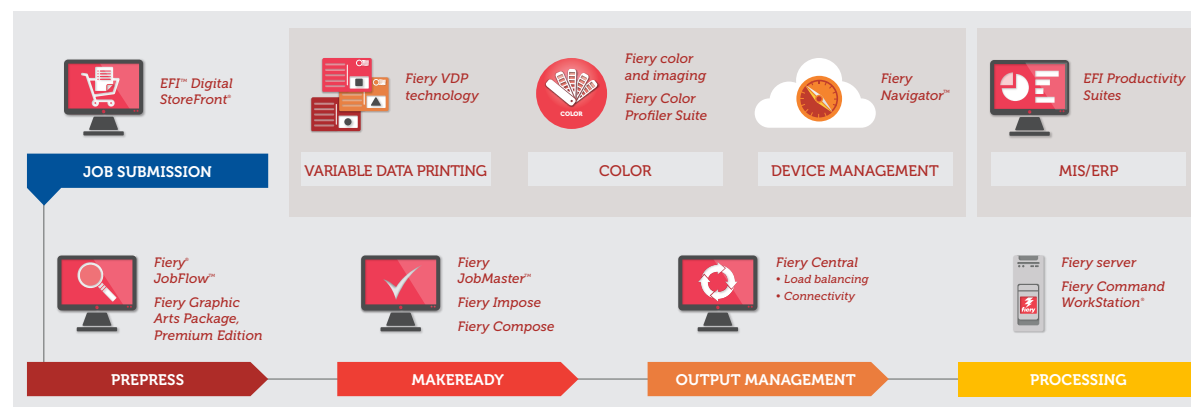

Produce new high-margin VDP services that get you and your customers noticed.

Device Management

Gain full visibility into your print operation and maximize equipment usage for higher profitability and efficiency.

MIS/ERP

EFI Productivity Suites integrate with Fiery servers.

Produce More, Adapt to Customer Needs and Grow your Business

To survive in today's market, you need to meet expectations of print buyers for flawless color, quick turnaround on complicated documents and high-quality output on jobs from a wide array of sources – all at competitive prices.

In order to thrive, you need to do more.

To grow your business, offer your customers new services and products as well as convenient communication methods. Exceed customer expectations of value and turnaround time through increased automation that drives down costs and speeds production. Fiery Workflow Suite helps you do all this and more. Produce more from your existing print engines with streamlined and automated workflows; quickly adapt to changing customer demands; and grow with new higher-profit, value-added services.

Produce

Streamlined, configurable workflows reduce touch points to eliminate human error and increase the capacity of your print engines:

- Automate job submission for increased accuracy.
- Use fully visual tools to dynamically preview how job settings affect the finished output.
- Deliver accurate, consistent color.

Adapt

Adapt to changing customer demands with modular offerings that let you choose what you need now and add more as you grow:

- Centralize control of print job management to make existing print assets more scalable and productive.
- Fiery Workflow Suite offerings integrate with each other, and with other EFI products — for easy implementation, deployment and use.

Grow

Add new customers and retain existing ones with top-quality output. Plus, strengthen your competitive capabilities with new value-added services:

- Develop the infrastructure to support personalized campaign management and efficient VDP production.
- Provide an always-open Web-to-Print storefront and new ways to communicate with customers.

05

Fiery Compose

The ability to efficiently output a finished document is key in production environments due to the high cost of manual labor to perform time-consuming finishing tasks. A composition tool such as Fiery Compose can optimize setting up all these parameters in the makeready workflow. It also provides a single, powerful interactive user interface that offers visual feedback on all steps in the process.

Fiery Central

Fiery Central integrates your production systems to make existing or new printers more scalable and productive. It combines multiple Fiery Driven™ digital printers, and other select printers, into a centralized print production system unified by Fiery Command WorkStation®, the award winning, intuitive user interface.

OCTOBER

2018

10

Fiery print servers are software-intensive digital front ends (DFE) that drive a full range of color and black-and-white digital print engines. They provide industry-leading performance, color accuracy, usability and integration that improve the quality and efficiency of digital printing and allow you to profitably provide a wider range of print services.

Device Management

Gain full visibility into your print operation with Fiery Navigator™. View and analyze key operational data to identify production patterns, evaluate current asset usage, and compare device performance. Use the insights to understand production trends, standardize operating procedures, and maximize equipment usage for higher profitability and efficiency. Plus share custom Fiery settings among the same model devices to ensure output consistency.
