

# Roses

Roses of any kind make a wonderful and fragrant addition to home gardens. Flora Garden Society roses are well known for their delicate beauty, long life, and fragrant blooms. There are hundreds of species of roses, many of which can be found in our catalog. It is no wonder that roses are the most popular flower in the world. Flora Garden Society roses are hardy and healthy plants. We are committed to carrying a wide-ranging selection, the newest hybrids, as well as tried and true varieties.

Roses are woody perennials, with shrubs ranging in size from miniature bushes to climbing varieties. Although roses are primarily used for their ornamental value, gardeners often plant large rose bushes to function as hedges or ground cover. To ensure a long life, plant roses in an area that receives full sun, especially in the morning hours. This way, any dew that accumulates overnight will dry early. For best results, rose bushes should be planted in well-drained soil and fertilized immediately after planting.
