

Material Traceability

For food and pharmaceutical packaging

Streamline and automate your data collection, inventory tracking and reporting for accurate, low-cost and low-risk material traceability:

By managing material traceability with the same workflow solution that you use for all of your other business and production processes, you can minimize errors, manual touchpints and administrative costs.

 **Perform with **one** workflow**
Manage traceability and all other parts of your business and production workflow with one integrated solution.

 **Train **one** time**
By using a single, familiar and scalable solution, you can minimize the pain of company expansion.

 **Enter information **one** time**
Eliminate redundant data entry. Once information has entered your workflow, don't make someone enter it again!

 **Partner with **one** strategic expert**
Consolidate vendor relationships with one partner that has helped thousands grow profitably into new markets.
