

Profit more with integrated workflows

Business-wide workflow automation and integration are keys to success in a print market with shorter run lengths and demands for faster turnaround times. EFI™ MarketDirect StoreFront® with a Fiery® digital print server offers all that and more.

Industry-leading print buyer experience with automated production

MarketDirect StoreFront lets you accept print orders online, facilitates customer communication, and translates order requirements into job tickets. Through the EFI certified workflow integration utilizing job definition format (JDF) technology, the job tickets are ready for production at the Fiery digital print server with virtually no job preparation or operator intervention.

MarketDirect Storefront offers an integration setup wizard for Fiery servers to help establish a touchless workflow quickly and easily. Online order attributes are automatically translated into print job settings and mapped to media libraries, layout settings, and inline finishing capabilities of your Fiery Driven™ press.

Automated, integrated workflow benefits

The integrated solution allows jobs to flow directly from order input to the appropriate Fiery Driven press to:

- Eliminate repetitive tasks and reduce manual touchpoints to make digital production faster, more efficient, more productive, and more profitable
- Allow for better communication with real-time bidirectional status updates to both customers and operators
- Set up variable data printing (VDP) jobs flowing seamlessly to the Fiery server for personalized communication

EFI MarketDirect StoreFront - Fiery integration highlights

DIGITAL PRESS CONNECTIVITY AND APPLICATIONS

FEATURE	HIGHLIGHT	DESCRIPTION
EFI Fiery Driven Digital Presses	The best performance, usability, color, and integration for digital presses	<ul style="list-style-type: none"> The widest selection of digital engines with industry-leading Fiery technology CIP4 JDF-certified to maximize interoperability Integration ready for EFI Print MISs and PrintFlow® as well as MarketDirect StoreFront Industry-leading processing speed with Fiery HyperRIP Match offset color quality with Fiery color management tools including Fiery Color Profiler Suite Simplify prepress workflows including complex makeready tasks through Fiery Impose, Compose, and JobMaster™
Fiery Central	Unified workflow for mixed printer environment	<ul style="list-style-type: none"> Bring Fiery Driven printers and popular production black-and-white printers into a unified workflow that uses the shared Fiery applications and enables JDF integration with EFI MarketDirect StoreFront and Print MIS solutions
Digital Applications	Value-add digital printing uses	<ul style="list-style-type: none"> End-to-end digital printing from online job order with imposition and inline finishing such as booklets, calendars, business cards, and postcards Automatic quick short-run print production or short-run reprints High-speed variable data printing
