

# Increase productivity and quality.

The Fiery® Productivity Package option for the embedded MX-PE14 Fiery Print Server includes a set of features essential for professional printing environments.

*Image Enhance Visual Editor applies automatic enhancement to optimize image quality without going back to native applications.*

- Advanced queue management controls to manage print priorities without disrupting production
- Image and color quality adjustment tools for last-minute image editing, right in Fiery Command WorkStation®
- Powerful softproofing and color management tools to minimize errors and waste
- Workflow automation solution for production of ready-to-print files with the fewest touch points and least potential for human errors
- JDF technology to automate and integrate business and print processes for higher efficiency and increased profit

# What's included

Here is the set of features included in the optional Fiery Productivity Package for MX-PE14 Fiery Print Server.

FEATURE	DESCRIPTION
Graphic arts filters for Hot Folders	Automates job submission through Hot Folders for graphic arts file formats
Schedule Print	Balances workload and prioritizes print production to minimize production peaks and eliminate bottlenecks
Print/Process Next	Lets the operator pick the next job to process or print immediately after the current job
Fiery Image Enhance Visual Editor	Adjusts individual images for brightness, contrast, highlights, shadows, color balance, and sharpness without opening and editing the file in the originating application
Fiery ImageViewer	Enables the user to visually check the final processed job before printing and apply color adjustments
Postflight report	Delivers color-coded job diagnostic reports to quickly and easily identify potential printing issues such as mixed source colors and missing spot colors
Control bar	Provides color quality control by placing the Ugra/Fogra Media Wedge, an industry-standard color bar, and job settings on every printed page
Configurable auto trapping	Controls trapping parameters and corrects misregistration in composite or separated documents
Fiery JDF	Enables built-in JDF-based integration support to automate processes from job submission to output by integrating print workflow and business management systems so that job information can flow through the systems with fewer touch points and errors
Fiery JobFlow™ Base	Automates job preparation steps to increase productivity by eliminating bottlenecks, reducing repetitive work, and minimizing touch points. Comes in two versions. Enable JobFlow Base (free) with the paid Fiery Productivity Package. Upgrade available to the full JobFlow version to expand workflow functionality.

# EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
