Fiery Workflow Suite CALENDAR 2016

January to December 2016

Fiery Workflow Suite

Powerful, Modular, Integrated

Fiery® Workflow Suite has solutions for every stage in the print production process. Modular offerings let you choose what you need now and add more as you grow. You can integrate current production systems by centralizing control of print job management to make existing print assets more scalable and productive. Plus, Fiery Workflow Suite products integrate with each other, with other EFI products and with third-party solutions—for easy implementation, deployment and use.

Job Submission

Facilitate your customers sending jobs to you and enable operators to submit those jobs to the print engine with the correct specifications.

Prepress

Streamline and further automate print workflows to ensure integrity of jobs before going to print to reduce errors and waste.

Makeready

Reduce labor-intensive document preparation with easy-to-use tools in one visual interface.

Output Management

Improve digital print production capacity, turnaround and productivity by centralizing control of print job management across multiple production systems.

Processing

Fiery servers drive printers across all printing environments, deliver amazing precision, RIP with blazing speed, and produce perfect color every time.

Color

Guarantee accurate, consistent and reliable color reproduction at all times.

VDP

Produce new high-margin VDP services that get you and your customers noticed.

Business Management

EFI business management software integrates with Fiery servers.

fiery.efi.com/FWS

Produce More, Adapt to Customer Needs and Grow your Business

To survive in today's market, you need to meet expectations of print buyers for flawless color, quick turnaround on complicated documents and high-quality output on jobs from a wide array of sources—all at competitive prices.

In order to thrive, you need to do more.

To grow your business, offer your customers new services and products as well as convenient communication methods. Exceed customer expectations of value and turnaround time through increased automation that drives down costs and speeds production. Fiery Workflow Suite helps you do all this and more. Produce more from your existing print engines with streamlined and automated workflows; quickly adapt to changing customer demands; and grow with new higher- profit, value-added services.

Produce

Streamlined, configurable workflows reduce touch points to eliminate human error and increase the capacity of your print engines:

- Automate job submission for increased accuracy.
- Use fully visual tools to dynamically preview how job settings affect the finished output.
- Deliver accurate, consistent color.

Adapt

Adapt to changing customer demands with modular offerings that let you choose what you need now and add more as you grow:

- Centralize control of print job management to make existing print assets more scalable and productive.
- Fiery Workflow Suite offerings integrate with each other, and with other EFI products — for easy implementation, deployment and use.

Grow

Add new customers and retain existing ones with top-quality output. Plus, strengthen your competitive capabilities with new value-added services:

- Develop the infrastructure to support personalized campaign management and efficient VDP production.
- Provide an always-open Web-to-Print storefront and new ways to communicate with customers.

05

Fiery Compose

The ability to efficiently output a finished document is key in production environments due to the high cost of manual labor to perform time-consuming finishing tasks. A composition tool such as Fiery Compose can optimize setting up all these parameters in the makeready workflow. It also provides a single, powerful interactive user interface that offers visual feedback on all steps in the process.

06

Fiery JobMaster

The ability to output a finished document is key in production environments due to the high cost of manual labor in time-consuming finishing tasks. Fiery JobMaster makes print operators more productive when performing makeready tasks for complex documents. Intuitive document assembly includes fully visual tab insertion and design, media assignment, page numbering, finishing, scanning and powerful late-stage editing features.

JULY

A close-up, horizontal photograph showing a hand reaching into a shallow metal bowl. The hand is adorned with a wide, ornate bracelet made of red and gold beads. The bowl contains a vibrant green chutney and yellow lentils. The background is a rustic, weathered wooden surface. To the left of the bowl, there is a circular, dark brown object with intricate gold-colored patterns and a central gold-colored knob, possibly a lid or a decorative piece.

08

Fiery Color Profiler Suite

Fiery Color Profiler Suite is a complete color management solution that allows users to create ICC profiles, optimize spot colors, perform color quality assurance and match color across multiple presses in a digital production environment. Fiery Color Profiler Suite streamlines the calibration and profiling processes and guarantees outstanding, accurate results every time.

SEPTEMBER

2016

Fiery servers provide state-of-the-art imaging technology, combined with expert color management tools, to deliver high-quality images with the accurate, consistent color customers want.

Fiery Imaging Technology

Fiery servers offer the highest level of performance and image quality, even on complex jobs with gradients, transparencies or overprints — even in VDP elements.
