## How To Use This Guide

This guide describes the changes made in EFI Technique v5.7.5. The first part of the guide describes the new feature and enhancement updates to the EFI Technique system, while the second part of the guide lists the defects repaired in v5.7.5.

Before you upgrade your EFI Technique system to v5.7.5, read the descriptions of the changes made to all the modules that you plan to use. Also read about the minimum system requirements and review any changes with other system users, as applicable. If you have any questions about how the changes may affect you or about changes that you must make to your system before you upgrade your system, please contact your EFI Technique Support representative.

## Contact Information

### EFI Support

---

<b>Web Site:</b>	<a href="https://customer.efi.com/support">https://customer.efi.com/support</a>
<b>UK Phone:</b>	+ 44 (0) 1246-298085
<b>US Phone:</b>	+1-855-EFI-4HLP
<b>E-Mail:</b>	<a href="mailto:technique.support@efi.com">technique.support@efi.com</a>

Regular USA Service Desk hours are 8:30 AM to 5:00 PM Eastern Time, Monday – Friday.

Regular European Service Desk hours are 8:30 AM to 5:00 PM Greenwich Mean Time (British Summer Time during summer), Monday – Friday.

**Note** For problems involving infrastructure (i.e., computers, networks, operating systems, backup software, printers, third-party software, etc.), contact the appropriate vendor. EFI cannot support these types of issues.

### EFI Professional Services

---

<b>UK Phone:</b>	+ 44 (0) 113 3836000
------------------	----------------------

EFI Professional Services can help you perform EFI software installations, upgrades, and updates. This group can also help you implement, customize, and optimize your EFI software plus offer a range of training options.

## v5.7.5 Enhancements

This section summarizes the product enhancements in EFI Technique v5.7.5 by module, including the corresponding issue number. Refer to the “v5.7.5 Defects” topic for detailed descriptions of all defect updates in this version of EFI Technique.

### MIS Console, Order Management, Technique Services Framework, Technique Web API

Within organisational maintenance of MIS Console, users with appropriate permission can now enter a timezone against individual sites.

**Issue:** When using the Printflow workflow, dates which are imported after a DST (Daylight Savings Time) boundary would be incorrectly offset by the difference between the server's time and the Printflow Client.

**Resolution:** The Printflow import routines will now ignore Timezones contained in the XML output from Printflow, instead using the Timezone information already entered against the site for each resource imported. This fixes the incorrect Timezone offsets which would normally be output by Printflow.

Enhancement | 02951792 | TECHNIQUE-8590 | v5.7.3

### Order Management

**Issue:** When Importing despatch/version data into Order Management versions are always set as finished.

**Resolution:** A new column to the CSV can be added: "VerFinished" if a valid false value, for example, "0" is entered, then the version will be created as non-finished. If not entered, versions will default to finished as previously. This field will also be present in exported files.

Enhancement | 03690612 | TECHNIQUE-8889 | v5.7.3

When creating or editing a load it is no longer mandatory to select a part reference. This permits load data to be entered before creating the finishing profiles.

Enhancement | TECHNIQUE-7741 | v5.7.3

## v5.7.5 Fixed Defects

This section summarizes the defects fixed in EFI Technique v5.7.5 by module, including the corresponding issue number and fix version. Refer to the “v5.7.5 Enhancements” topic for detailed descriptions of all enhancement updates in this version of EFI Technique.

### Contract Management

**Issue:** If the contract issue number is changed and the order has been scheduled in PrintFlow then Technique continues to show the original schedule for the routes.

**Resolution:** If the contract issue number is changed and the order has been scheduled in PrintFlow then Technique will show a status of 'To Do' for the routes.

Defect | TECHNIQUE-4353 | v5.7.3

### Estimating

**Issue:** Additional operations were not being displayed in the reprice finishing screen and the operation details were missing from the quote XML file.

**Resolution:** Additional operations are displayed in the reprice finishing screen and the operation details are included in the quote XML file.

Defect | 03728177 03747570 | TECHNIQUE-8899 | v5.7.3

### Estimating, Technique Web API

**Issue:** Expected press route is not being created for a configuration with a sheet selected.

**Resolution:** Non-open size sections now generate print routes for valid configurations when the configuration has a sheet entered.

Defect | 02249005 | TECHNIQUE-9056 | v5.7.3

### Inventory Scan

**Issue:** Unable to login to Inventory Scan due to errors.

**Resolution:** Inventory Scan users are now able to receive deliveries.

Defect | TECHNIQUE-8900 | v5.7.3

**Issue:** Unable to receive deliveries in Inventory Scan.

**Resolution:** Now able to login to Inventory Scan.

Defect | TECHNIQUE-9170 | v5.7.5

### Invoice Generation

**Issue:** Cannot add invoices together to create a multi invoice.

**Resolution:** Fix to a rounding issue of the invoice line total that was making it differ from the revenue total and preventing valid invoices from being joined.

Defect | 03714471 | TECHNIQUE-8891 | v5.7.3

---

## MIS Console

Issue: Within a French locale environment, Planning fails to open with error Type Mismatch.

Resolution: The Planning application successfully opens within a French locale environment.

Defect | 03750541 | TECHNIQUE-9077 | v5.7.3

## Order Management

Issue: The calculated order value for contract orders was not always consistent with invoicing.

Resolution: The calculation of contract order values has been updated to be consistent with recent changes in invoicing.

Defect | TECHNIQUE-8901 | v5.7.3

Issue: A duplicate Purchase Order (PO) for an outworker within an order in Order Management was being created when the original PO had been received and a Purchase Invoice had been received against the PO.

Resolution: A duplicate Purchase Order (PO) for an outworker within an order in Order Management is not created when the original PO has been received and a Purchase Invoice has been received against it.

Defect | 03741063 03741528 | TECHNIQUE-8882 | v5.7.3

Issue: When Order Management application setting #15 (OPT\_AUTO\_JOB\_NO) is false, the copy order window does not permit the manual entry of a job number and a job number is assigned automatically.

Resolution: When Order Management application setting #15 (OPT\_AUTO\_JOB\_NO) is false, the copy order window permits the manual entry of a job number or it may be left blank for later assignment.

Defect | 02604917 | TECHNIQUE-6414 | v5.7.3

## Technique Web API

Issue: API call to process Printflow exported schedule fails if any tasks are unplanned.

Resolution: Unplanned tasks are set to "To Do" in Technique Scheduling as previously..

Defect | TECHNIQUE-9283 | v5.7.4

---
