How To Use This Guide

This guide describes the changes made in EFI Technique v5.7.8.

Before you upgrade your EFI Technique system to v5.7.8, read the descriptions of the changes made to all the modules that you plan to use. Also read about the minimum system requirements and review any changes with other system users, as applicable. If you have any questions about how the changes may affect you or about changes that you must make to your system before you upgrade your system, please contact your EFI Technique Support representative.

Contact Information

EFI Support

Web Site:	https://customer.efi.com/support
UK Phone:	+ 44 (0) 1246-298085
US Phone:	+1-855-EFI-4HLP
E-Mail:	technique.support@efi.com

Regular USA Service Desk hours are 8:30 AM to 5:00 PM Eastern Time, Monday – Friday.

Regular European Service Desk hours are 8:30 AM to 5:00 PM Greenwich Mean Time (British Summer Time during summer), Monday – Friday.

Note For problems involving infrastructure (i.e., computers, networks, operating systems, backup software, printers, third-party software, etc.), contact the appropriate vendor. EFI cannot support these types of issues.

EFI Professional Services

UK Phone:	+ 44 (0) 113 3836000
------------------	----------------------

EFI Professional Services can help you perform EFI software installations, upgrades, and updates. This group can also help you implement, customize, and optimize your EFI software plus offer a range of training options.

v5.7.8 Fixed Defects

This section summarizes the defects fixed in EFI Technique v5.7.8 by module, including the corresponding issue number and fix version.

Calculation Engine

Issue: Cannot process Printflow xml and a HTTP 500 error message is displayed.

Resolution: The xml being processed had a job with an invalid date which was in the missing hour when clocks go forward due to daylight savings time. A fix has been done to move these invalid job dates forward by the daylight savings time offset. This may cause some possible overloading of jobs and may show some jobs as having extra duration.

Defect | 03867937 | TECHNIQUE-9707 | v5.7.8

Contract Management

Issue: Data in custom fields associated with bindery operations or inserts was not being copied by the copy order/issue function.

Resolution: The data in the custom fields is copied as expected.

Defect | TECHNIQUE-9724 | v5.7.8

Estimating

Issue: When performing the 'Pre Cut' selection against a component using custom paper, the 'Master' drop down menu does contain Master sheet size selections.

Resolution: The Master drop down menu populates with valid selections when a custom paper price is defined.

Defect | 03788080 | TECHNIQUE-9422 | v5.7.8

Information Console

Issue: The 'Total Cost' column of the Costing Work In Progress Report was only populated where there was a labour cost.

Resolution: The 'Total Cost' column of the Costing Work In Progress Report is always populated.

Defect | 02864215 | TECHNIQUE-7415 | v5.7.8

Inventory Management

Issue: Inserts received through Inventory Management did not appear in the Finished Goods Stock Browser.

Resolution: The insert stock is now shown in the Stock Browser.

Defect | 03834937 | TECHNIQUE-9507 | v5.7.8

Issue: When not using an insert code constructor the Batch Number in the Order Management Insert Master window was not populated after receipting inserts through Inventory Management.

Resolution: The Batch Number is now populated.

Defect | 02123483 03834948 | TECHNIQUE-8433 | v5.7.8

Issue: When not using an insert code constructor the Part Reference in the Order Management Insert Master window and in Inventory Management was incorrectly populated as 'New Part' after receipting inserts through Inventory Management.

Resolution: The Part Reference is now correctly populated.

Defect | 02535842 03834956 | TECHNIQUE-8371 | v5.7.8

Inventory Scan

Issue: Users are unable to scan locations when moving Paper or Work In Progress items.

Resolution: Focus has been set to the warehouse dropdown to enable scanning of locations

Defect | 02830882 02929430 03692768 03776350 | TECHNIQUE-6971 | v5.7.8

Invoice Generation

Issue: When raising an invoice for a contract order, if the invoice had initially been previewed then the first attempt to generate the invoice would fail to open the Invoice Review window. An invoice for zero value with revision number zero would be recorded in the History window.

Resolution: When raising an invoice for a contract order, if the invoice had initially been previewed then the first attempt to generate the invoice will succeed and will have a revision number of one.

Defect | 02923965 02933847 | TECHNIQUE-8306 | v5.7.8

Order Management

Issue: Number up reset to 1 when changing the method on a print route to one without a valid sheet size associated on open size routes.

Resolution: Number up is now unaffected when changing the method on a print route to one without a valid sheet size associated on open size routes.

Updated the sheet warning to prompt the user to check the number up.

Defect | 03782822 | TECHNIQUE-9359 | v5.7.8

Issue: Error when clicking on a resource in Order Management.

Resolution: Users no longer receive an 'Invalid use if null' error when clicking on a resource in the Finishing tab in Order Management, when there was a missing record for the selected section.

Defect | 02822519 | TECHNIQUE-6942 | v5.7.8
