EFI Professional Services can help you perform EFI software installations and upgrades. This group can also help you implement, customize, and optimize your EFI software, plus offers a range of training options.

## Customer Enhancements/Defects Addressed in this Release

### Folded Size Added

Folded size has been added to Job Details screen (Issue reference: 21117)

### Adding Ink Color

You can now add ink color on the fly. Set up your preferences under Admin > Table Editor > Ink Colors to add ink from input. When you create a press job you can key in an ink color name vs selecting one from the list. (Issue Reference: 21131)

### Adding Charges

Adding a charge will now allow a negative value whether it is user entered or automatically entered. (Issue Reference: 21119)

### Stock Weight Displayed

Stock weight will now be displayed next to the stock name. Based on the preferences setting the stock name would be appended with Stock weight and finish. The search in the drop down would still be based on only stock name. (Issue Reference: 21115)

### Line Item Taxation

Line item taxation is not currently supported in HTML5. As a result users will not be allowed to create an estimate or pickup in HTML5 if the customer has line item taxation enabled. (Issue Reference: 21498)

### Printing Job Tickets

If you have an invoice open and click Print Job Tickets, you will be asked if there is a charge not associated with a job and to print a job ticket. If you click NO the job ticket would not print. Now it will print minus the charge. (Issue Reference: 21373)

### Shipping Charges and Job Tickets

If you have a job ticket with shipping charges and printed the job ticket from the invoice window the second page with the address charge will now print. (Issue Reference: 21449)
