Increase productivity and quality

The Fiery® Productivity Package option for the embedded Fiery IC-420 print server includes a set of features essential for professional printing environments.

- Automated job submission features for increased productivity

- Advanced queue management controls to manage print priorities without disrupting production

- Image and color quality adjustment tools for last-minute image editing, right in Fiery Command WorkStation®

- Workflow automation solution for production of ready-to-print files with the fewest touch points and least potential for human errors

- Powerful softproofing and color management tools to minimize errors and waste

- JDF technology to automate and integrate business and print processes for higher efficiency and increased profit

What's included

Here is the set of features included in the optional Fiery Productivity Package for IC-420.

FEATURE	DESCRIPTION
Fiery Hot Folders	Automates the job submission process and batch processing of multiple files with the same print settings
Graphic arts filters for Hot Folders	Automates job submission through Hot Folders for graphic arts file formats
Fiery Virtual Printers	Configures specific "File-Print" submission process for an output device so users don't have to specify print settings for multiple jobs
Print/Process Next	Lets the operator pick the next job to process or print immediately after the current job
Fiery Image Enhance Visual Editor	Adjusts individual images for brightness, contrast, highlights, shadows, color balance, and sharpness without opening and editing the file in the originating application
Fiery ImageViewer	Enables the user to visually check the final processed job before printing and apply color adjustments
Postflight report	Delivers color-coded job diagnostic reports to quickly and easily identify potential printing issues such as mixed source colors and missing spot colors
Control bar	Provides color quality control by placing the Ugra/Fogra Media Wedge, an industry-standard color bar, and job settings on every printed page
Configurable auto trapping	Controls trapping parameters and corrects misregistration in composite or separated documents
Paper simulation	Achieves accurate output simulations for special media by manually adjusting the hue, brightness, and saturation of the paper substrate being simulated
Fiery JDF	Enables built-in JDF-based integration support to automate processes from job submission to output so that jobs can flow through the systems with fewer touch points and errors
Fiery JobFlow™ Base	Automates job preparation steps to increase productivity by reducing repetitive work and minimizing touch points. Enable JobFlow Base (free) with the paid Fiery Productivity Package. Upgrade to the full JobFlow version to expand workflow functionality.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
