# **How-to:** Automate offline finishing with Graphic Whizard PT 335SCC finisher

Use pre-made templates to automate most common jobs

efi
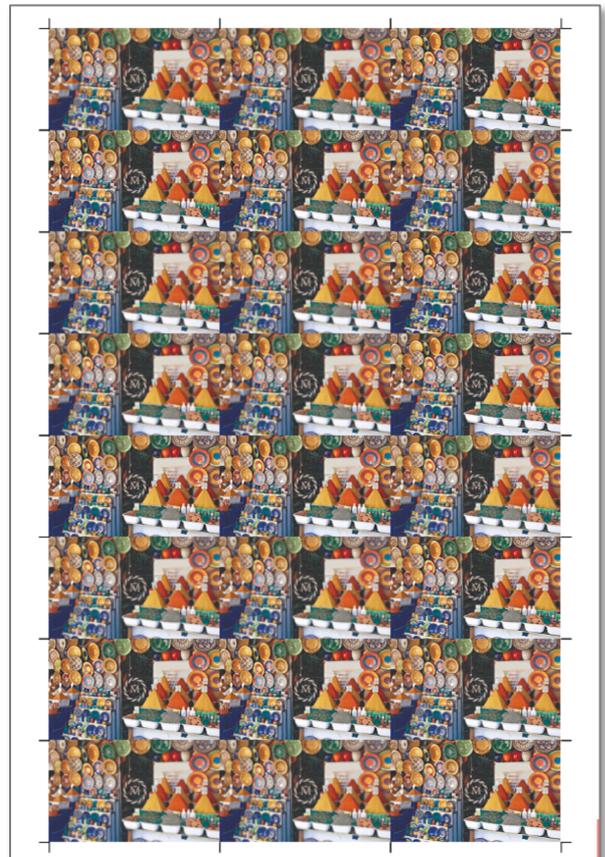

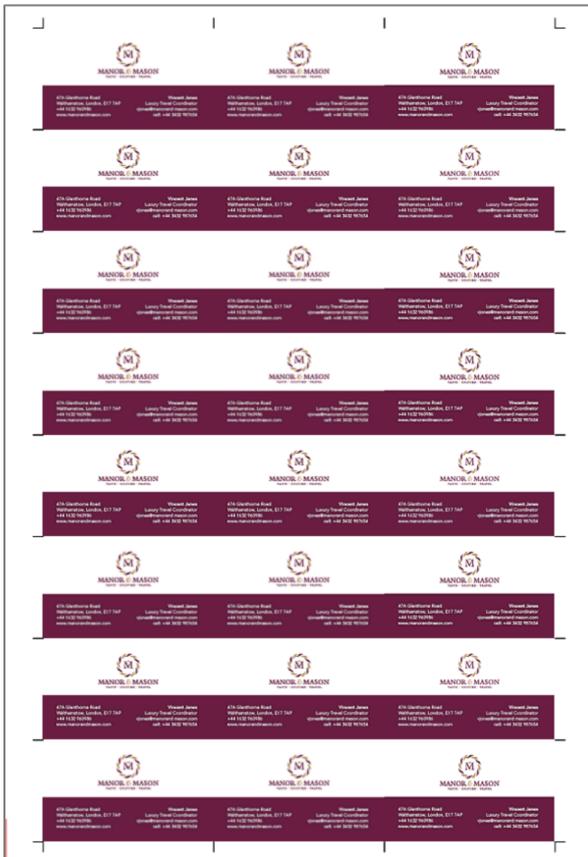

Feature overview

Fiery® Impose is the most intuitive PDF-based sheet imposition software on the market. Tight integration with Fiery Command WorkStation®, makeready software, and prepress tools helps automate print job submission.

Fiery Impose templates allow users to save the most common job layouts to automate the imposition process. Templates can also include barcodes and registration marks. These are recognized by the barcode scanner in Graphic Whizard PT-335scc finisher equipment..

The barcodes and registration marks on the printed sheets instruct the Graphic Whizard PT 335scc on how to position blades, cutters, and creasers to finish the print job.

Integrating Fiery Impose with Graphic Whizard PT-335scc finisher bring dramatic productivity gains to job preparation and finishing by automating the process. This saves time, plus minimizes waste and errors.

Use pre-made templates to automate most common jobs

Objectives

- Identify where imposition templates are stored on the Fiery Command WorkStation computer client
- Load the Impose-Graphic Whizard templates in the Fiery imposition template folder
- Add Graphic Whizard PT-335scc device profile to Fiery Impose for ease of adding barcode and registrations compatible with this model of finisher
- Create and save an Impose-Graphic Whizard template for a business card as an example

Additional resources

For additional software downloads, training resources, and more, go to: Fiery Online Resources.

For additional templates and job applications visit the Graphic Whizard web site at:
http://www.graphicwhizard.com/pt-335scc-multi/

Before you begin

- Open Fiery Command WorkStation 6.4, and connect to at least one Fiery server.
- Activate the Fiery Impose license on the computer running Command WorkStation. Fiery Impose can either be fully licensed or running in trial mode. To request the free 30-day trial for Fiery Impose, go to: fiery.efi.com/impose/freetrial30.
- Depending on the paper size standard you use, open the zip file **Fiery_Impose_ Graphic_Whizard_Templates_US.** Copy the file to a location you can access from the client running Command WorkStation.
- Place the sample file, **MnM_business_card_landscape_SAMPLE.pdf**, in the Fiery server **Held** queue by dragging the file. Or use the Command WorkStation Import menu option.
- Make sure the printer and Fiery server have been calibrated before printing any output.

Identify the Fiery imposition template

1. Select any spooled job in the **Held** queue. Right-click to select Fiery **Impose.**
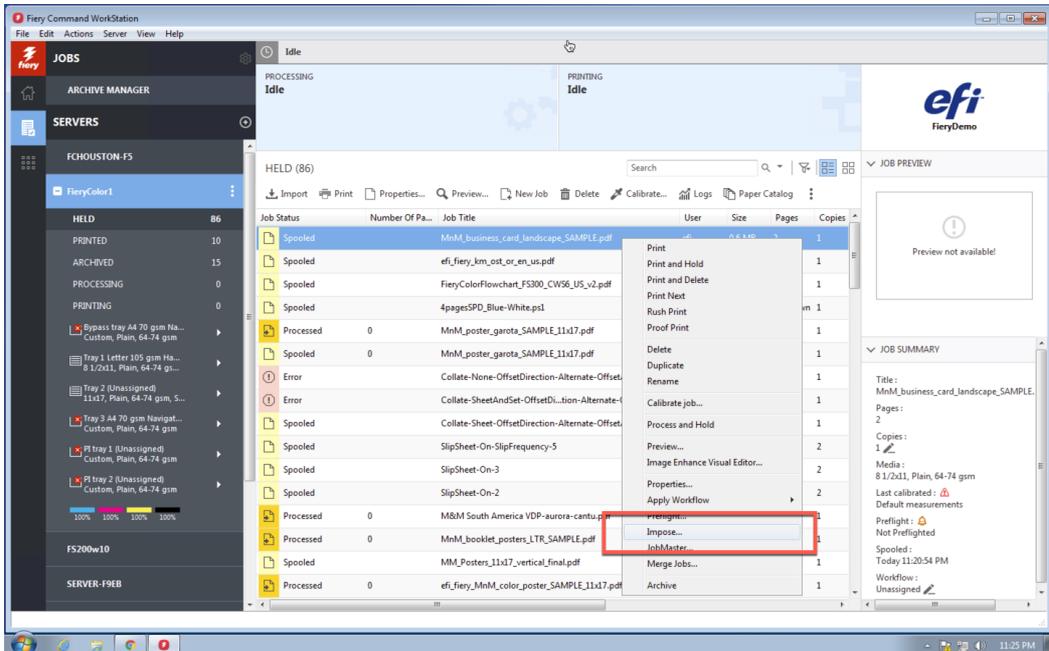

2. In Fiery Impose, go to Edit and select **Preferences**.
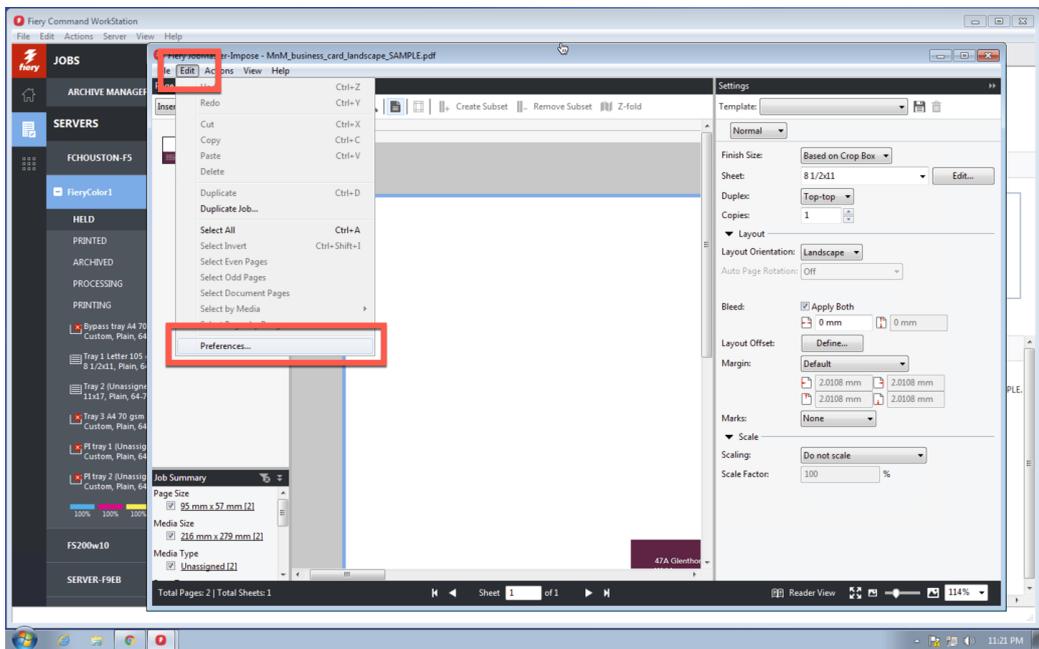

3. Click **IMPOSE** to view the preferences for Fiery Impose.
4. Note the default Imposition Template path location.
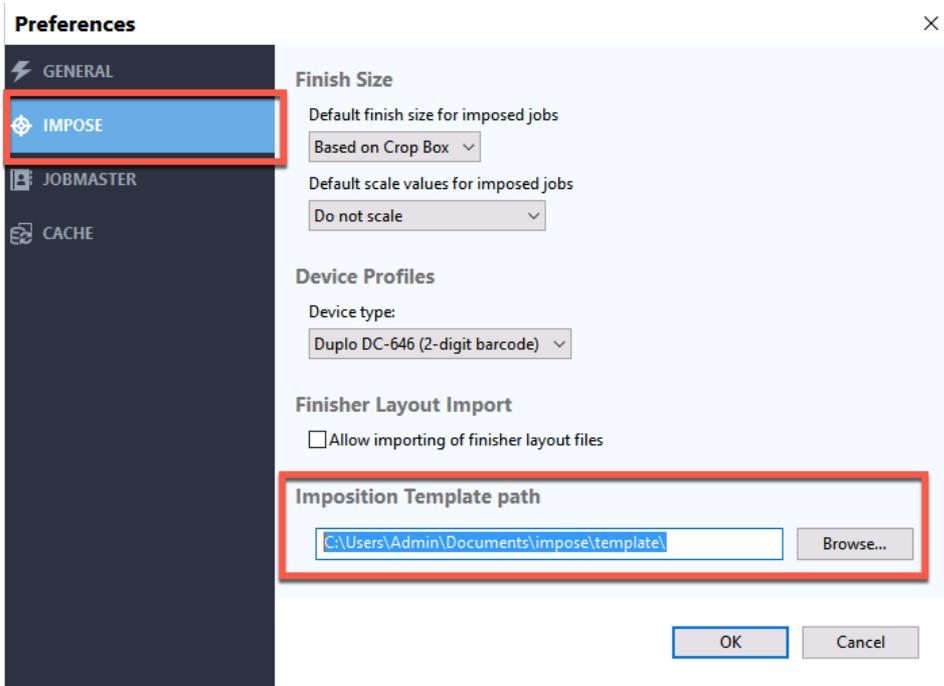

The imposition template path location contains the templates you can access in Fiery Impose.

Add the Graphic Whizard barcode templates to Fiery Impose

1. Open the Fiery server, Windows or macOS client and browse to the location where you stored the **Fiery_Impose_Graphic_Whizard_Templates_US** folder.

2. Open the folder.

3. Copy the .dbt files you want, and paste into the imposition template path location identified in the previous step. C:\Users\Admin\Documents\impose\templates

4. These additional templates are now available to use in Fiery Impose.

Add the Graphic Whizard device profiles to the Fiery server

On the Fiery server or Windows workstation

o On the Fiery, go to the windows start menu.

o Windows Explorer and navigate to
C:\Program Files\Fiery\Components\EFI\Impose3\DevProfiles

o Save Graphic Whizard device profiles in the DevProfiles folder.

On the Macintosh workstation

o On the Macintosh

o Open the Finder window

o Navigate to your System Hard Drive

o Navigate to the **/Library/Application Support/EFI/Impose/DevProfiles/**

o **Save the Graphic Whizard device profiles in the DevProfiles folder**

Apply an imposition template for a business card

1. Select the **MnM_business_card_landscape_SAMPLE.pdf** file in the Command WorkStation Held queue. Then right-click and select **Impose**.
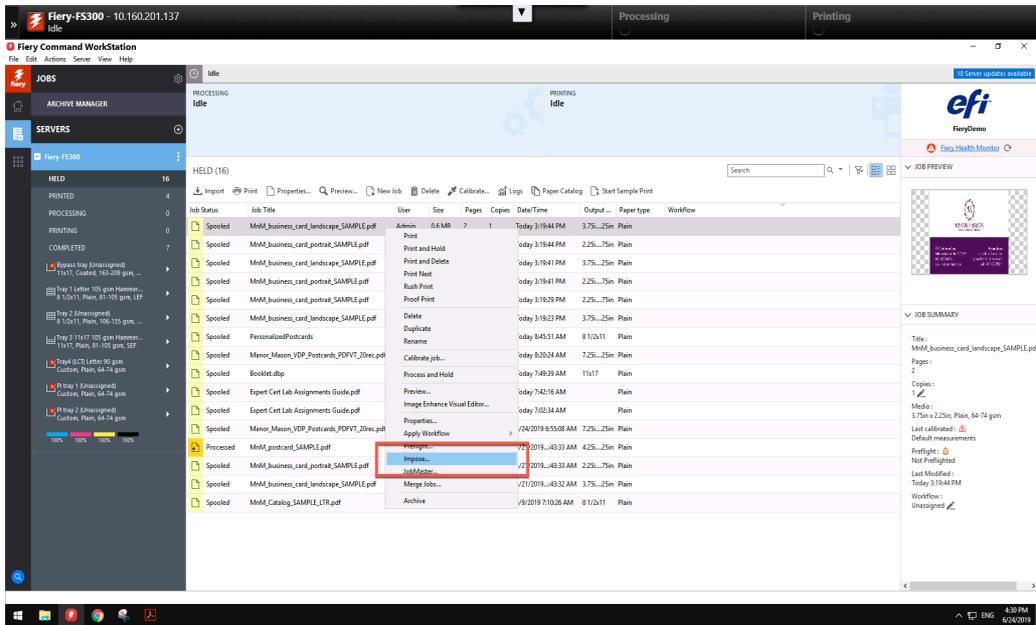

2. In the Settings pane, select **Template** to view the available templates.

3. Select the desired template. For this example, select **335SCC Multi #165_BizCard_2x3.5_12x18_24up**
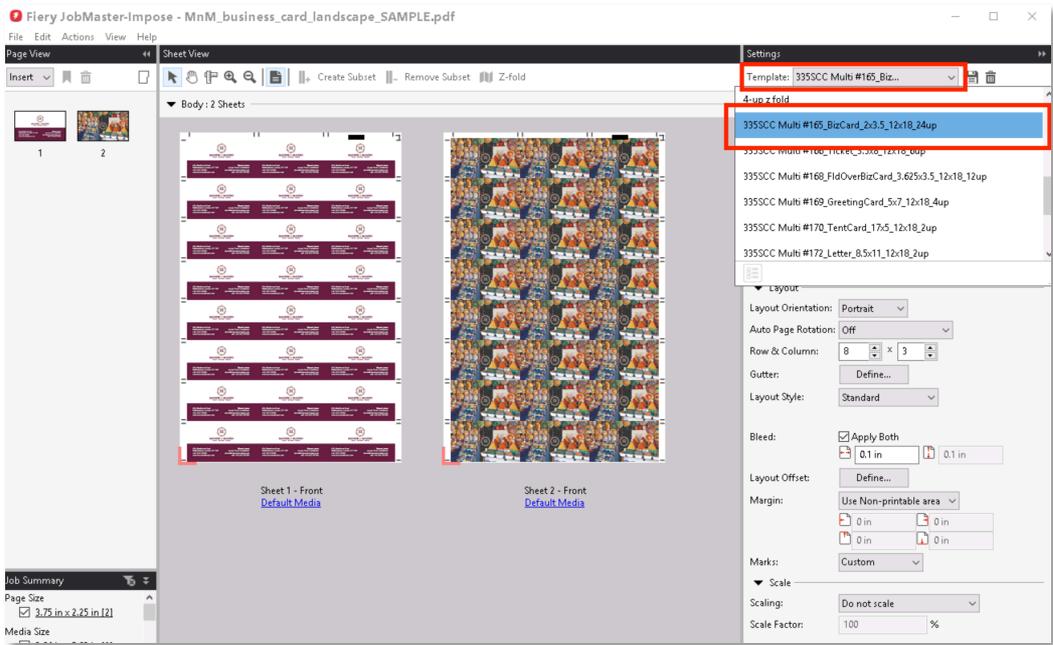

As the name of the template indicates, the template layout is designed for business card jobs with a trim box of 3.5 inches wide and 2 inches high, with a .125 inch bleed.

4. To view the default registration marks and barcode under Marks, click **Define**.
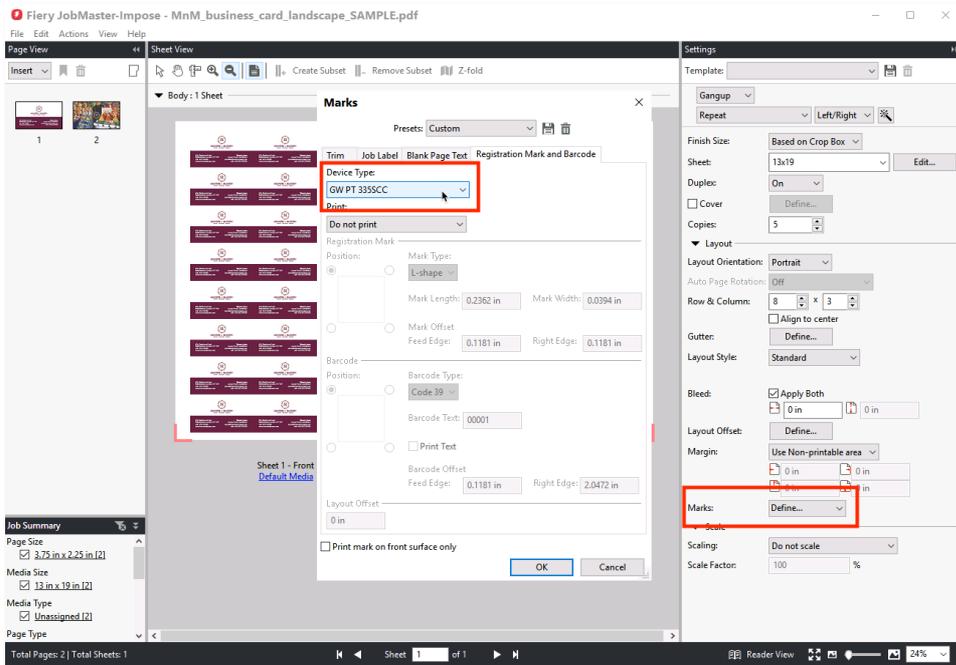

5. Click the **Registration Marks and Barcode** tab. These settings in the Impose template are automatically defined. Select **OK.**
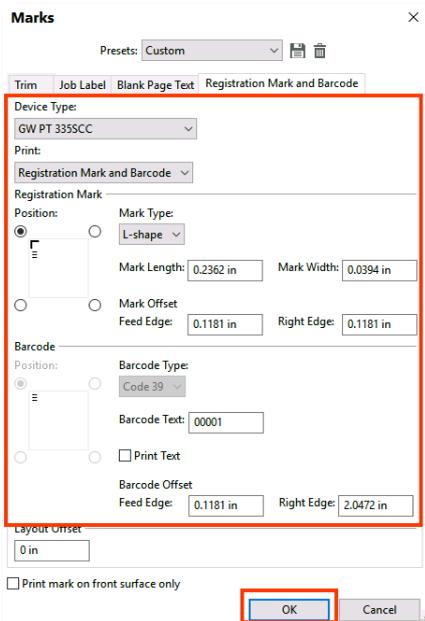

This impose template can be used for automated submission workflows using Fiery JobFlow Base or Fiery JobFlow. With Fiery FS400, you can also automate with Job Properties, Job Presets, Virtual Printers, and Hot Folders .

6. To save and name the job and exit Impose, click **File > Exit**.
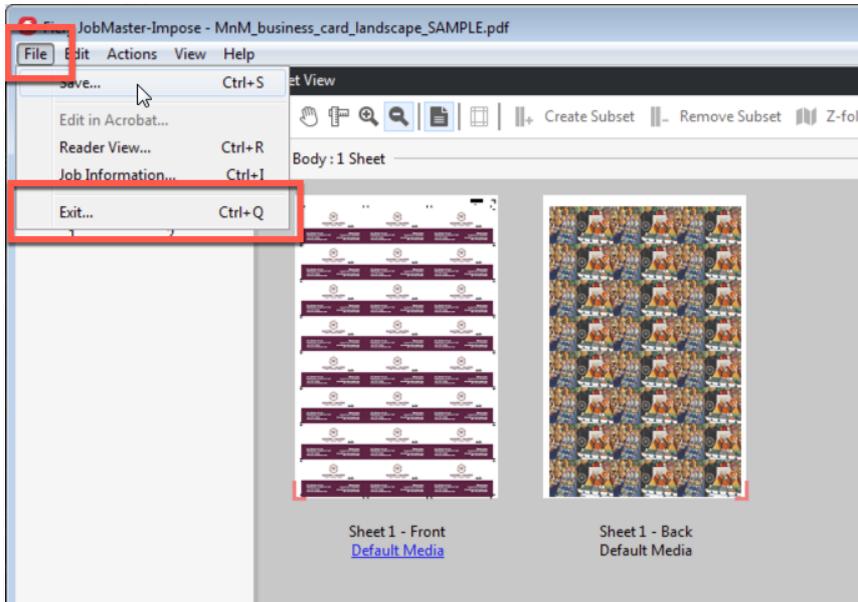

7. Click **Save,** and in the Save as: dialog box, change the job name to **Business_Cards**. Then, click **Yes** when done.
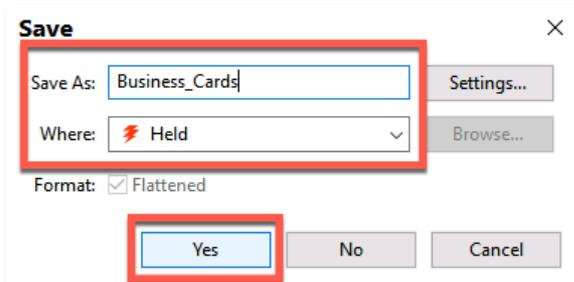

8. The new job is saved in the Held queue. Right-click on the job and select **Print**.

Complete production on the Graphic Whizard finisher

1. Load printed sheets onto the Graphic Whizard PT-335SCC finisher.

2. In the Graphic Whizard inline controller select job number **165** in the custom job memory

   OR   press the **play** button on the home screen and turn on the **barcode and register** mark reading functions in the upper right-hand corner (when activated a green check mark ☑ will appear).
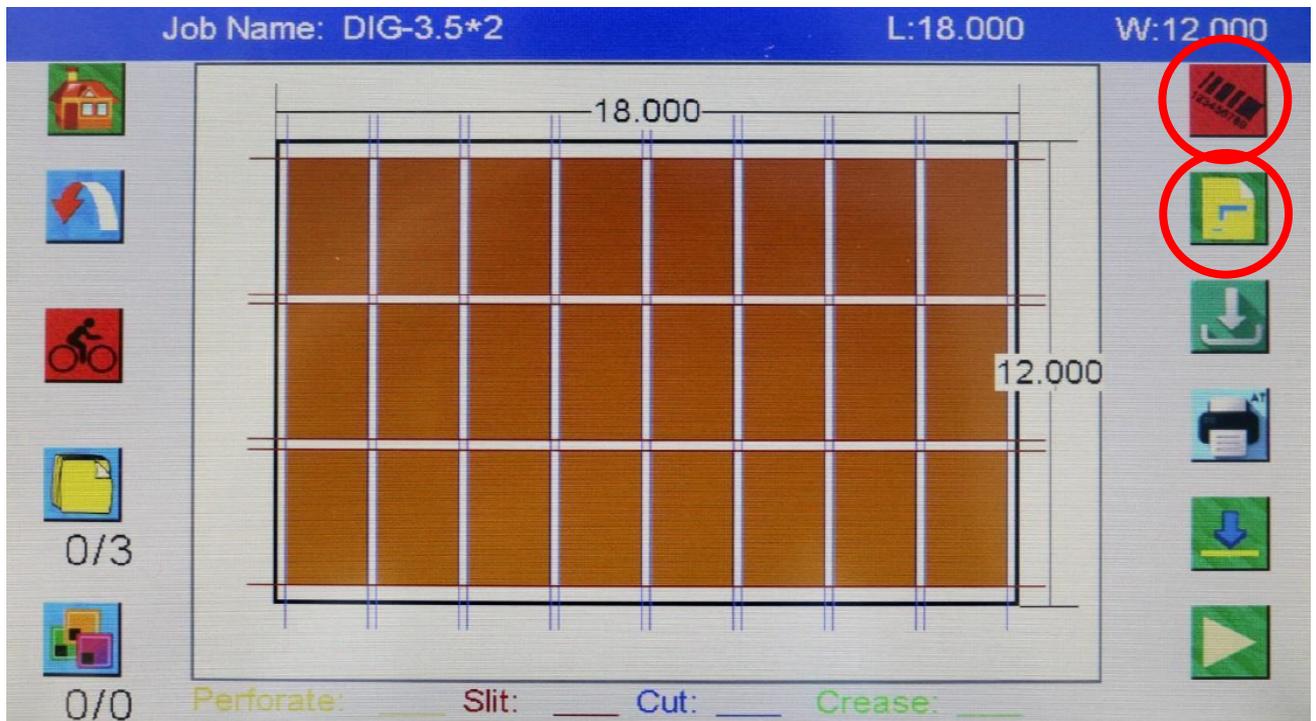

3. Press **start** to run the job. The scanner will automatically detect the finishing template, based on the barcode, and begin processing the job.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
