

Xerox® EX-i C9065/C9070 Print Server Powered by Fiery®

SPECIFICATIONS

World class color output and simplified document layout and composition, all in a more efficient, integrated workflow.

ACCURATE, CONSISTENT COLOR.

Accurately reproduce corporate and other spot colors with Fiery Spot-On™ to ensure consistency. Use default color settings for great color quality out of the box, or use optional tools, like Fiery Color Profiler Suite, to adjust and refine color.

TURN UP THE IMPACT WITH PERSONALIZATION.

With Fiery FreeForm™ Create, you can quickly and simply personalize existing files for free – with no additional VDP software required. Add variable elements such as text, images, or barcodes with just a few clicks.

STREAMLINE DOCUMENT LAYOUT AND COMPOSITION.

Simplify job preparation with Fiery Impose (optional) and save time by automating common imposed jobs, such as business cards, postcards, and brochures. Manage tabs, media selections, apply last minute edits, and assign multiple finishing requirements in an intuitive, visual interface with the standard Fiery Compose software. Or, add Fiery JobMaster™ (optional) to define and design complex tabs and perform advanced page editing functions.

AFFORDABLE INTEGRATION.

Standard Fiery JDF connectivity boosts digital workflow efficiency by integrating with existing prepress, web-to-print, or MIS/ERP systems to eliminate manual touchpoints, errors, and resource waste. The server integrates with Xerox ConnectKey applications and common cost accounting software.
