

How-to:

Scan and edit images with Fiery® JobMaster™

How-to: Scan and edit images with Fiery JobMaster

Feature overview

Fiery JobMaster offers the ability to import scanned pages either using a TWAIN compliant scanner or Fiery Remote Scan, in addition to importing previously scanned pages in PDF or image file formats.

Merging scanned documents with existing electronic documents saves time and the expense of recreating the document in the original application. Using scan import with JobMaster, you can perform image cleanup and deskew functions for a polished look for your document.

Once the scanned pages are inserted in Fiery JobMaster, users can apply further touchups to them without leaving Fiery JobMaster. This capability is possible through integrating with image editing applications such as Microsoft Paint, Preview on Mac, Adobe Photoshop and GIMP, so that you can apply further edits such as moving objects around the page, adding text, and any other editing function supported by the image editor of your choice.

Objectives

- Create a new job in JobMaster and insert a scanned image
- Edit scanned pages using the image editing application and save changes

Additional resources

For additional software downloads, training resources and more, go to [Fiery Online Resources](http://www.efi.com/FieryOnlineResources). Please refer to the document: [Scan and import pages with Fiery JobMaster](http://www.efi.com/FieryOnlineResources/ScanandimportpageswithFieryJobMaster) for more information.

Before you begin

- Open Fiery Command WorkStation® 6.4 or later and connect to a Fiery server running Fiery FS400 Pro that supports Fiery JobMaster.
 - For the updated list of supported printers, go to [www.efi.com/Fiery JobMaster](http://www.efi.com/FieryJobMaster)
- To request the free 30-day trial for Fiery JobMaster, go to: <http://fiery.efi.com/JobMaster/freetrial30>
- Activate the Fiery JobMaster license on the computer running Command WorkStation.
- Ensure the printer and Fiery server have been calibrated before printing any output.

Scan, import and edit image application:

Setting up image editing application preferences:

The image editing feature in JobMaster allows you to use any image editing application installed on your computer to modify or correct scanned pages and images without leaving the JobMaster application.

To set up your JobMaster preferences to choose your preferred image editing application:

- 1. From the Command WorkStation HELD queue toolbar, select **New Job**
- 2. In JobMaster, select **Edit > Preferences** from the top toolbar.
- 3. Next select **JobMaster**. In the **Image Editing Application** section browse and select the default image editing application you would like to use to edit your images, for example, Mircrosoft Paint is available on Windows and Preview is available on Mac.

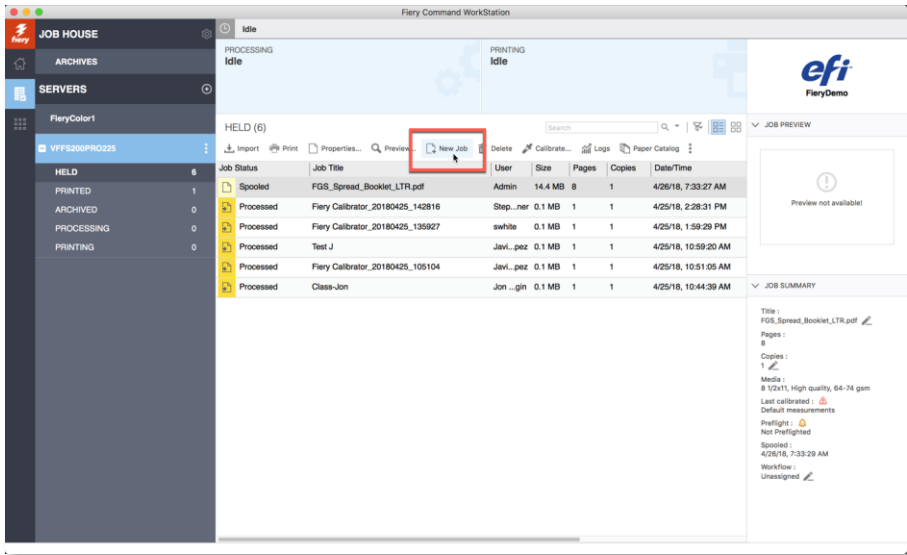

Windows		Mac	
Microsoft Paint	Paint 3D		
Paint.net			
Photoshop		GIMP	

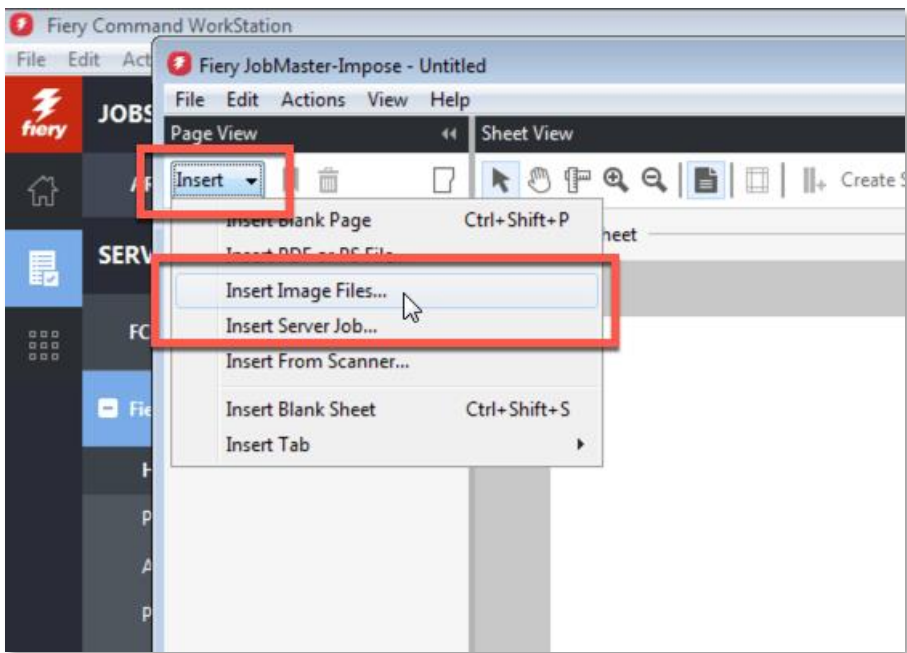

Supported image editing applications

Working with the image editing application:

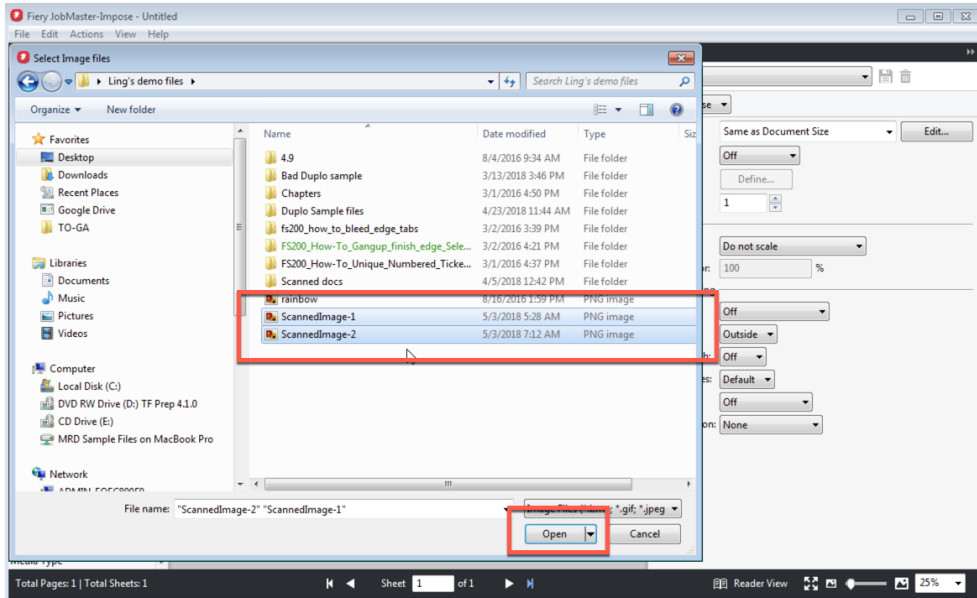

- 1. On the Command WorkStation toolbar, select **New Job**.

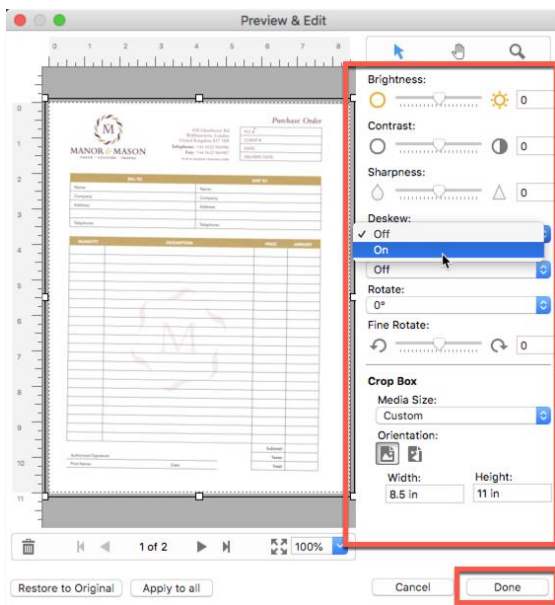

- 2. Select **Insert** and then select **Insert Image Files**.

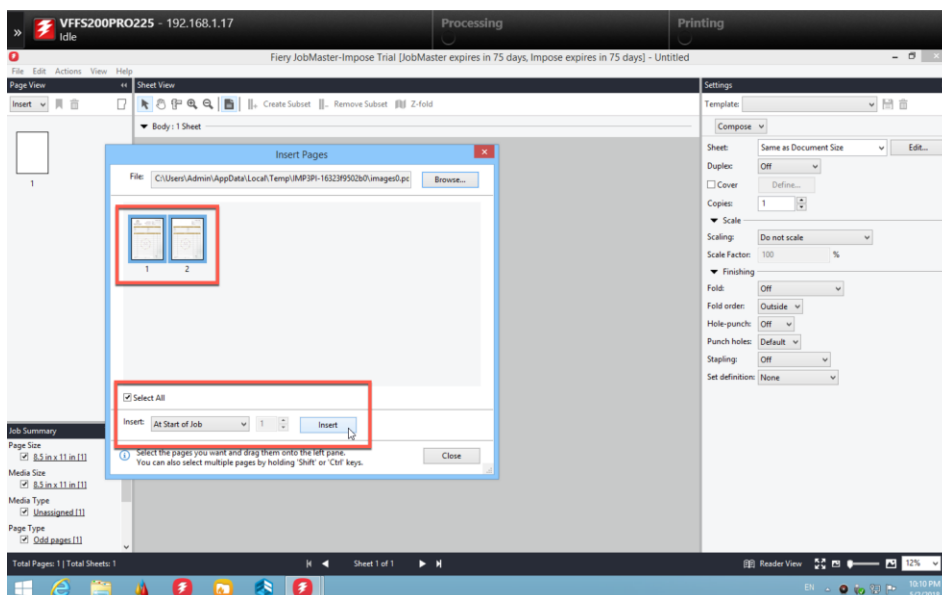

3. Select the sample files **ScannedImage-1.png** and **ScannedImage-2.png**. Select **Open**. You are able to insert PDF, PS, image and scanned files using a TWAIN compliant scanner or Fiery Remote Scan, in addition to importing previously scanned pages. To edit files with the image editing application they must be bitmap images.

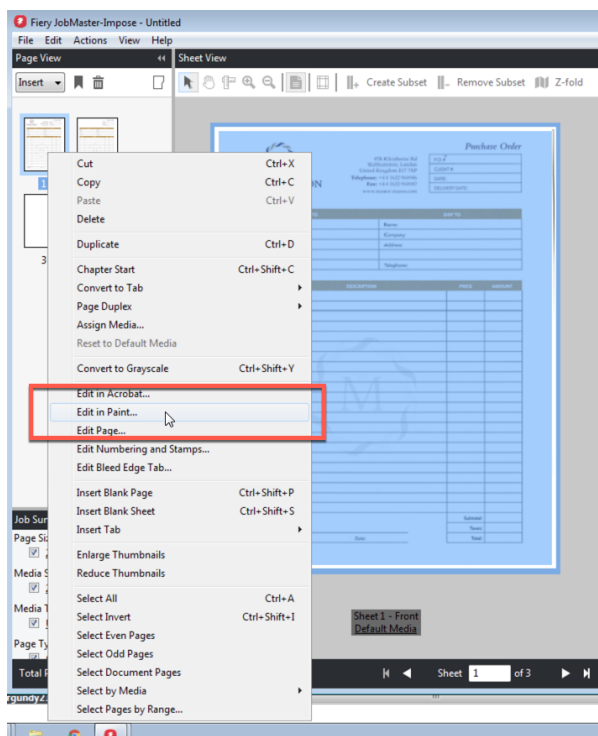

4. If you are importing an image file or a scanned image, the **Preview & Edit** window will open and tools including Brightness, Contrast, and Sharpness controls. Deskew, Despeckle, Rotate and Fine Rotate controls are part of the feature. Apply Deskew and any other cleanup as necessary, select **Apply to all** if your cleanup selections are to be applied to all pages. Select **Done**.

- In the Insert Pages window, select the pages to insert, and where your scanned images are to be inserted in the document. Select **Insert**.

- In the **Page View** window, select page one, **right click** and in the drop down menu select **Edit in Paint**. The document will be opened in Paint or the image editing program selected in JobMaster preferences.

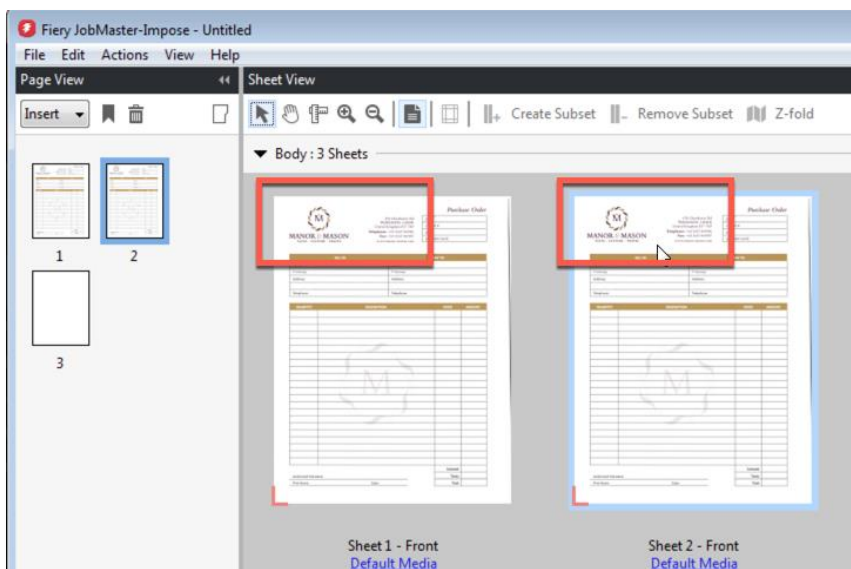

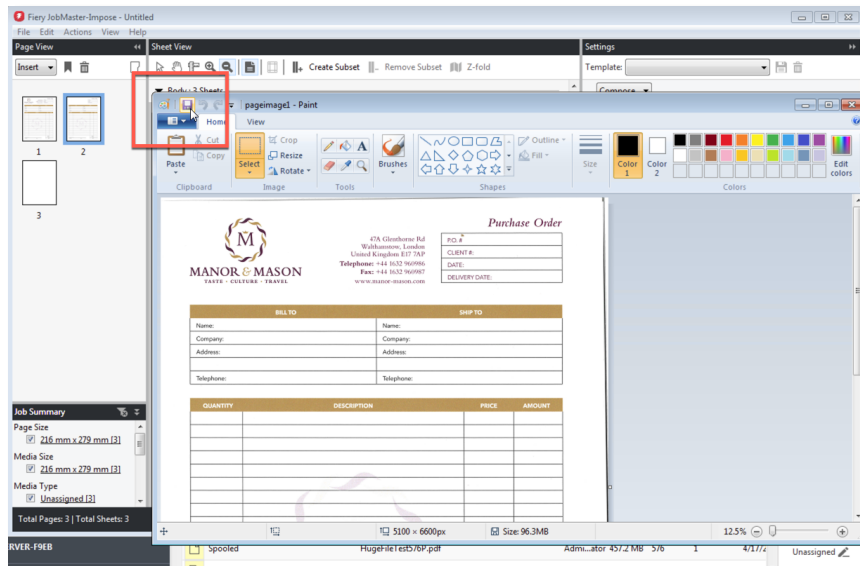

7. In the Microsoft Paint window, Choose the **Select** and then the **Square Selection tool** from the toolbar. Make your selection over the logo and address of page one. Press Control “C” on the Windows client or Command “C” on Mac, to copy your selection.

8. Close the document and **select page two** in the Page View Window. Right click and in the drop down menu select **Edit in Paint**.
9. In Microsoft Paint, select the **Paste** button in the toolbar. Move your placed logo and address to its final location and click to the side of the selection.

10. Select the **Save** button in the top toolbar and your document will be saved directly back into JobMaster. With the **image editing application**, you can leverage the image editing capabilities of any image editing software on your computer and save that job right back into JobMaster.
