

How-To:

Produce jobs with different finishing requirements

How-To: Produce jobs with different finishing requirements

Feature Overview

In high-volume production environments producing multiple-page jobs including multiple chapters or sections like training manuals, business reports or business proposals, customers may often require special manual assembly due to specific requirements in some of their subsections. For example, some sections may need special finishing like z-fold for a tabloid insert, hole-punch, staple or other requirements.

In order to produce jobs like these, customers would have the needed to print the chapters separately and manually assemble the output, making these a very labor-intensive job.

The Mixed Finishing Sets feature available in Fiery Compose and Fiery JobMaster™ streamlines and automates the assembly process to produce a fully finished job. With an in-line finisher attached to the print engine, customers can select multiple options and subsets in a single job. Mixed Finishing Sets also allows users to specify different finishing options among different subsets. These finishing options will vary based on the in-line finisher and print engine. Fiery Compose and Fiery JobMaster are document layout applications that have a flexible and intuitive visual interface that simplifies document preparation and gives operators the tools to achieve superb results with ease. It allows for page-level job ticketing for optimum control of the document.

Objectives

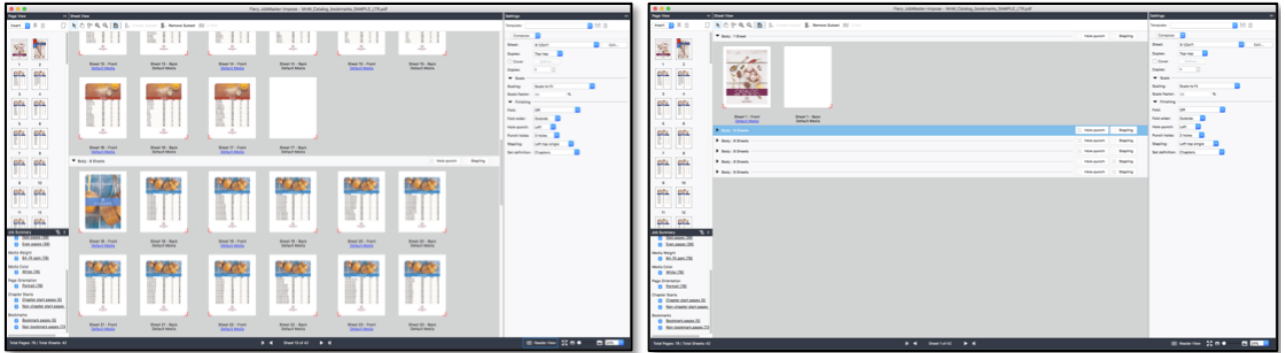

- Define chapters and define different finishing requirements to each chapter.

Additional Resources

For additional software downloads, training resources and more, go to [Fiery Online Resources](#).

Before you begin

- For Fiery Compose, have Fiery Command WorkStation® 6.4 or above opened and connected to a supported Fiery server running Fiery FS400/FS400 Pro or above.
- For Fiery JobMaster, connect Fiery Command WorkStation 6.4 or above to a supported Fiery server.
 - For the updated list of supported printers go to www.efi.com/fieryjobmaster
- To request the free 30-day trial for Fiery JobMaster, go to: <http://fiery.efi.com/jobmaster/freetrial30>.
- Activate the Fiery Compose or Fiery JobMaster license on the Command WorkStation client.
- Place the following files in the Fiery HELD queue. Drag and drop the file to the Command WorkStation HELD list or use the Command WorkStation Import menu option.
 - **MnM_catalog_SAMPLE_LTR.pdf** or **MnM_catalog_SAMPLE_A4.pdf**
- Ensure the printer and Fiery have been calibrated before printing any output.

Define Chapters

1. In Command WorkStation select the file **MnM_Catalog_SAMPLE_LTR.pdf** or **MnM_Catalog_SAMPLE_A4.pdf** in the HELD queue, right-click and select **Compose**.
2. In the Page view pane, hold the Ctrl or Command key while selecting each page. For this example, select pages 2, 17, 32, 47, and 62. Then right-click to select Chapter Start or click the Chapter Start icon .

Select multiple pages by holding the "Shift" or "Ctrl" key.

If you want to insert all the pages from the selected document, you can also select the file name and drag and drop this on to the Page View pane.

Define Mixed Finishing Sets

1. In the Settings pane, set **Duplex** to **Top-top**.
2. Select **Hole-Punch: Left** and **Punch Holes: 3 Holes**.
3. Select **Stapling: Top Left Single**.
4. Select **Set Definition: Chapters**.

Duplex and Finishing options will vary with device and the in-line finishers.

5. In the Sheet view pane, begin to customize the finishing settings for each subset. There are 6 subsets in total.
 - a. Uncheck the Hole-Punch and Stapling option for Subset 1 (sheet 1).
 - b. Uncheck the Stapling option for the Subsets 2, 3, 4 (2-9, 10-17 and 18-25 sheets).
 - c. Uncheck the Hole-Punch option for the Subsets 5 and 6 (26-33 and 34-42 sheets).
6. Select the Reader view icon in the lower-right corner under the Settings pane to see document layout as it will print. Use the arrow keys or click the Sheet/Page to access the Go to Page.

You will see the designated Chapter start pages will appear on the right side of the reader view. Close the Reader view when done.

7. Close Compose and enter a new job name in the **Save As** field to identify this job in the Fiery HELD queue, select **Yes**.
8. The new job will be saved in the HELD list and is ready to print.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity. Visit www.efi.com or call 650-357-3500 for more information.
