

EOL Statement Regarding AuctionInc.

August 12, 2020

Dear MarketDirect StoreFront Customer:

We at EFI are committed to providing our customers and partners with superior products and services. We strive to provide a broad range of solutions and continually review our solution portfolio to discover how we can strengthen it. Strengthening our product offerings leads us at times to retire support for legacy versions of software and product components after new and enhanced versions have become well established.

Please note the following changes:

- **AuctionInc:** Effective March 2021, EFI will no longer support AuctionInc shipping rating service. As of MDSF version 11.2, EFI ExpressRater will replace the functionality and be enabled by default for customers that have already configured AuctionInc.

Note: For customers that have not configured AuctionInc previously and would like to take advantage of shipping cost calculations, please follow the steps in the “Site Settings Shipping Cost Configuration Tab” help topic in the administration online help to configure ExpressRater. ExpressRater is available in MDSF version 11.2 and beyond.
