

Issue 44 – October 2020

Welcome to our newsletter! The third this year, they're our way to help keep you updated on the World of Fiery®. In this issue, you will learn more about EFI™ IQ™, the new suite of cloud applications, see how automation can be just the right fit for you, learn how to deliver on point color, get access to free webinars and learning courses, and much more. Happy reading.

EFI IQ – A suite of cloud applications for intelligent print production

EFI IQ – a new suite of cloud applications can capture production data to help you run a more profitable print business. Use free applications to extract value from your data.

- IQ Dashboard: View today's key production data and make decisions to get more volume out the door.

- EFI Insight: Capture production data and transform it into valuable trend analytics.
- EFI Go: Track your print devices and print jobs with a mobile app.

Take a test drive

Automation that grows with your business

Fiery JobFlow™ automates job preparation steps in prepress workflows to produce ready-to-print files with fewer mouse clicks. Start meeting tight deadlines and increasing output capacity with the free Fiery JobFlow Base* and upgrade to Fiery JobFlow as you see the benefits of automation for yourself, or [try Fiery JobFlow for free for 30 days.](#)

Webinars: Best practices to reach your color goals. And maintain them.

Achieving consistent, accurate, and saleable color comes from conquering your color management process, from the designer's intent to the finished job, and all the steps in between. Watch the recording for the first webinar of this series and save your spot in the second session to learn about meeting buyer color expectations, mastering color management fundamentals, building a color process control system, and using the latest technologies to ensure you can reach and maintain your color goals.
