

Automate from prepress to finishing

Save up to 80% in setup time by automating job prep and eliminating manual data entry with **Fiery Impose** in Fiery Driven™ print environments. The integration between Fiery Impose and **Duplo DC Slitter/Cutter/Creaser finishers** offers time-saving workflows that can be applied to both standard and custom layout jobs.

Duplo DC-618, DC-646, DC-746

STANDARD JOBS:

Duplo provides imposition templates — for the most common jobs such as business cards or postcards — to use in Fiery Impose. The templates come pre-set with measurements for the margins and gutters as well as finishing sizes. The templates use barcodes and registration marks that let the Slitter/Cutter/Creaser adjust automatically without intervention.*

Duplo DC-646, DC-648, DC-746

CUSTOM JOBS:

Create a new custom layout file on the Duplo PC controller, import it into Fiery Impose and instantly see a visual preview of finishing lines to quickly verify job designs before printing.*

Duplo DC-618

CUSTOM JOBS:

Easily set up a custom imposition layout entirely within Fiery Impose including cut, crease, and perforation finishing marks for even more time savings. With this advanced finishing integration, there is no longer a need to set up a finishing layout on the Duplo controller and import it into Impose. Fiery Impose has built-in knowledge of the DC-618 configuration options and constraints.**
