

Xerox® EX-P 5 Print Server Powered by Fiery®

Unparalleled Performance for Maximum Profit Potential

The powerful Xerox® EX-P 5 Print Server driving the Xerox® iGen® 5 Press features HyperRIP, a unique parallel-processing technology that enables blazing-fast RIP speeds. Two HyperRIP modes (for single and multiple jobs) optimize job processing speed to help achieve uninterrupted production and higher profits. The EX-P 5 Print Server supports all industry-standard variable data printing (VDP) formats, enabling a single, common print production workflow for all file types and allowing you to do more in less time.

New Levels of Creativity with a Fifth Station

Make a bold, high-value impression on any digital print with the new Clear Dry Ink option. Or, add Orange, Green or Blue Dry Inks as a fifth color to expand your gamut and match more brand colors. Built-in features like Fiery ImageViewer, Fiery Spot-On™ and Fiery Image Enhance Visual Editor make it easy to manage any fifth station option throughout your workflow.

Offset-Level Quality and Color Control

Get the best out-of-the-box color consistency and accuracy with Fiery color management tools. Fiery Color Profiler Suite allows you to confidently match color standards to ensure color consistency throughout print runs and across multiple printers. Differentiate your business with the capability to print text and graphics in high definition for the industry's best image quality.

Optimize workflow efficiency and productivity.

Fiery Command WorkStation® centralizes job management and makes getting jobs out the door faster and more efficient. Easily drive multiple presses from one interface and manage multiple jobs simultaneously from a Mac® or Windows® client for maximum productivity. Fiery Impose-Compose offers intuitive, visual document preparation and simplifies labor-intensive document assembly. Easily use imposition templates with an automated job submission workflow to reduce touchpoints and errors.

Automate with seamless integration.

In high-volume businesses, automation and integration are key to a profitable operation. The open Fiery platform has the only submission-to-production portfolio to allow you to set your business apart and receive a greater return on investment. The EX-P 5 Print Server conforms to industry standards and serves as a gateway to Xerox® FreeFlow® Core and EFI solutions such as EFI™ Digital StoreFront® and EFI MIS/ERP business software. Fiery JDF and API technologies help you automate and integrate your business and print process at a minimal cost so you can use your workforce more wisely, shorten lead times and produce more jobs profitably.

The EX-P 5 Print Server integrates with AGFA® :APOGEE™ Prepress, Kodak® Prinergy® Workflow and Heidelberg® Prinect® so you can submit jobs to and manage one or more Fiery Driven™ digital print engines from the same familiar user interface.

By supporting the Adobe® PDF Print Engine®, Fiery servers also offer a native end-to-end PDF workflow that allows you to improve the consistency and flexibility of your printed output from design to print.
