

How-to: Scan and edit images with Fiery JobMaster

Feature overview

Fiery® JobMaster™ offers the ability to import scanned pages either using a TWAIN compliant scanner or Fiery Remote Scan, in addition to importing previously scanned pages in PDF or image file formats.

Merging scanned documents with existing electronic documents saves time and the expense of recreating the document in the original application. Using scan import with JobMaster, you can perform image cleanup and deskew functions for a polished look for your document.

Once the scanned pages are inserted in Fiery JobMaster, users can apply further touchups to them without leaving Fiery JobMaster. This capability is possible through integrating with image editing applications such as Microsoft Paint, Preview on Mac, Adobe Photoshop and GIMP, so that you can apply further edits such as moving objects around the page, adding text, and any other editing function supported by the image editor of your choice.

Objectives

- Create a new job in JobMaster and insert a scanned image
- Import and insert scanned images and PDF files
 - Modify and clean up a scanned image
 - Use Brightness, Contrast, Sharpness,
 - Use the Deskew, Despeckle, Rotate, and Crop tools

Additional resources

For additional software downloads, training resources, and more, go to [Fiery Online Resources](#). Please refer to the document: [Scan and import pages with Fiery JobMaster](#) for more information.

Before you begin

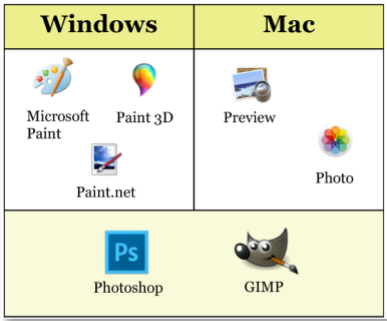

- Open Fiery Command WorkStation® 6.7 or newer. Connect to a Fiery Driven™ printer running Fiery FS500 / FS500 Pro system software or newer.
 - For the updated list of supported printers go to: fiery.efi.com/jobmaster/supported-printers.
- To request the free 30-day trial for Fiery JobMaster, go to: fiery.efi.com/jobmaster/freetrial30.
- Activate the Fiery JobMaster license on the computer running Command WorkStation.
- Ensure the printer and Fiery server have been calibrated before printing any output.

Setting up image editing application preferences:

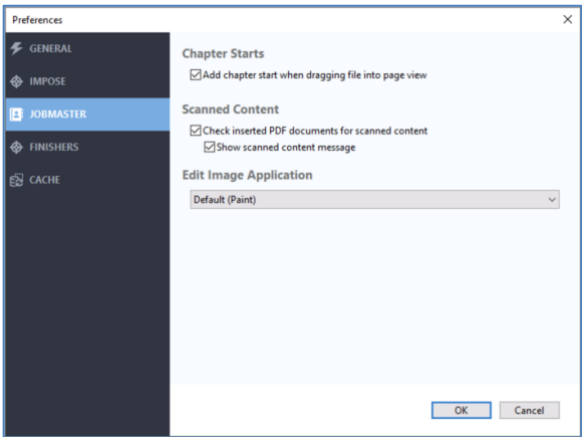

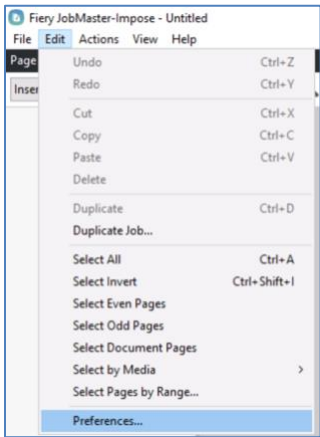

The image editing feature in JobMaster allows you to use any image editing application installed on your computer to modify or correct scanned pages and images without leaving the JobMaster application.

Set up your JobMaster preferences to choose your preferred image editing application:

- 1. From the Command WorkStation HELD queue toolbar, select **New Job**.
- 2. In JobMaster, select **Edit > Preferences** from the top toolbar.
- 3. Next select **JobMaster tab**.
- 4. In the **Image Editing Application** section browse and select the default image editing application you would like to use to edit your images, for example, Microsoft Paint is available on Windows and Preview is available on Mac.

Supported image editing applications

*Note that the settings will be applied the next time JobMaster is started, so **close** the JobMaster application for the settings to take effect. Confirm that you want to close the New Job window without saving the job.*

Working with the image editing application

With the **image editing application**, you can leverage the image editing capabilities of any image editing software on your computer and save that job right back into JobMaster.

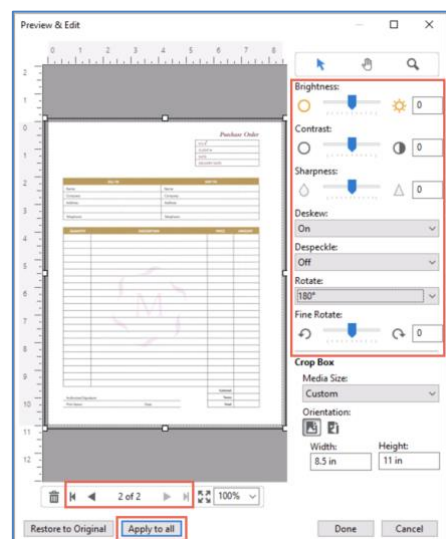

1. In the Command WorkStation toolbar select **File > New Job**.
2. Select **Insert > Insert Image Files**.

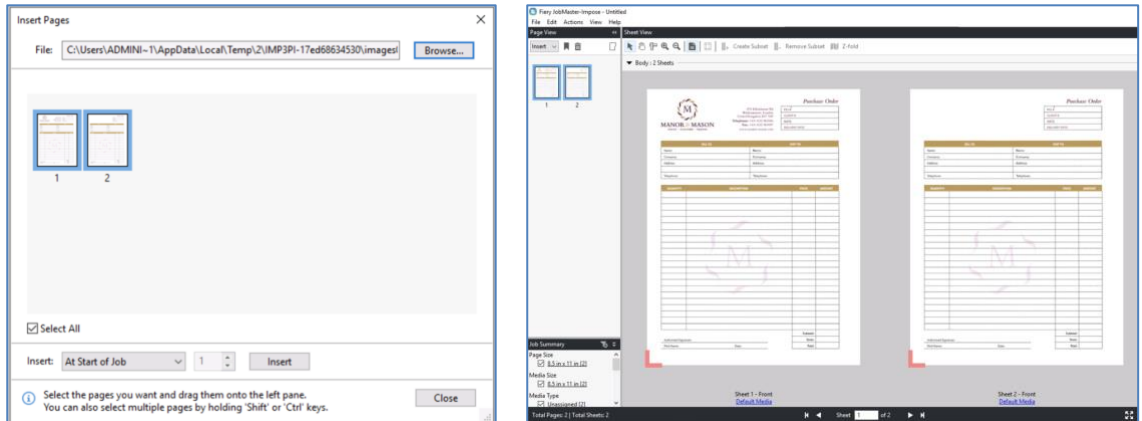

3. Find and highlight the **ScannedImage-1.png** and **ScannedImage-2.png** image files and select **Open**. You can insert PDF, PS, image, and scanned files using a TWAIN compliant scanner or Fiery Remote Scan, in addition to importing previously scanned pages. To edit files with the image editing application they must be bitmap images.

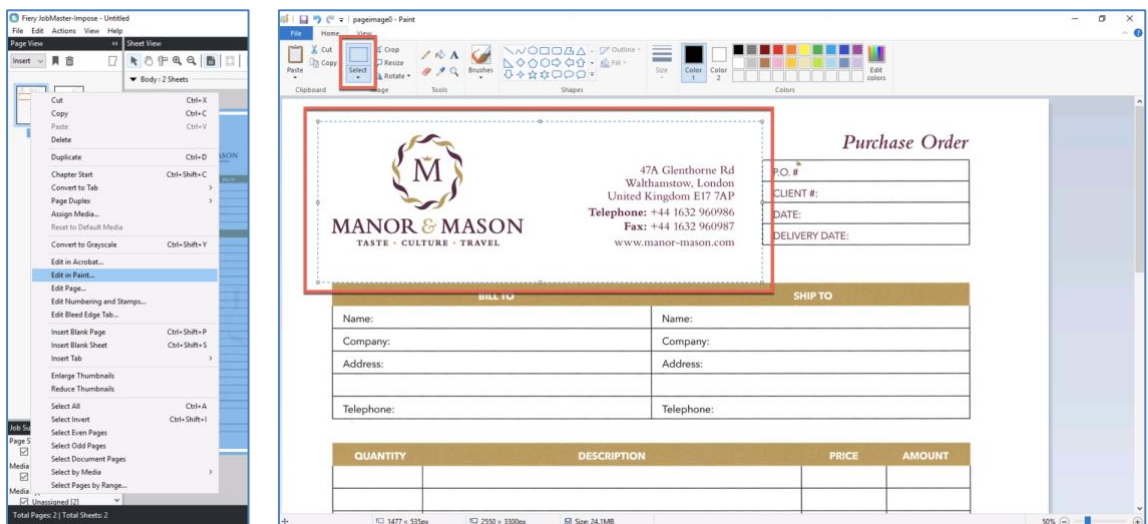

4. If you are importing an image file or a scanned image, the **Preview & Edit** window will open with controls to adjust: Brightness, Contrast, Sharpness, Deskew, Despeckle, Rotate and Fine Rotate. Apply Deskew and any other cleanup as necessary. Select **Apply to all** to apply your cleanup selections to all pages if desired.
5. Click on the **Next Page** forward arrow on the bottom to go to page 2.
6. Now rotate page 2 by 180 degrees. Select the **Rotate** drop-down list and choose **180**.
7. Select **Done** to close the **Preview & Edit** feature and automatically open the **Insert Pages** window.
8. Select **Done** to close the **Preview & Edit** feature and automatically open the **Insert Pages** window.

9. The corrected pages will be displayed. Click the **Select All** checkbox to choose all the pages. In the **Insert** section, select **After Page** and set the page number to 1.
10. Click the **Insert** button, and then click the **Close** button.

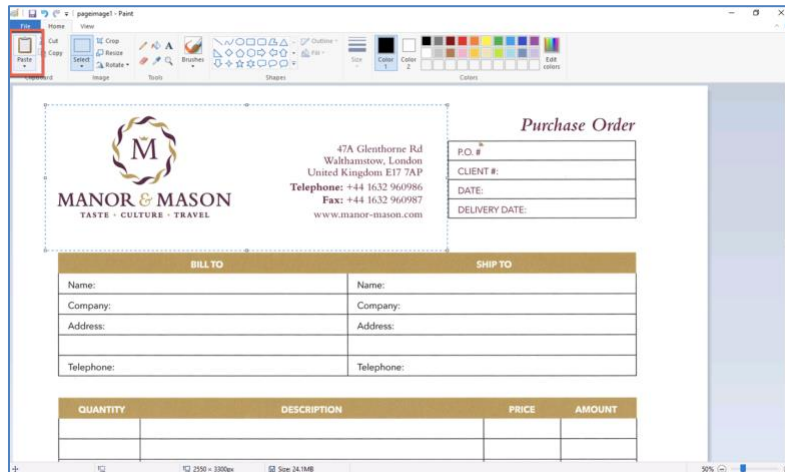

11. In the Page View window, select page 1, right click and in the drop-down menu select **Edit in Paint**. The document will be opened in Paint or the image editing program selected in JobMaster preferences.
12. In the Microsoft Paint window, Choose the **Select** and then the **Square Selection** tool from the toolbar. Make your selection over the logo and address section on page 1. Press Control "C" on the Windows client or Command "C" on Mac, to copy your selection.

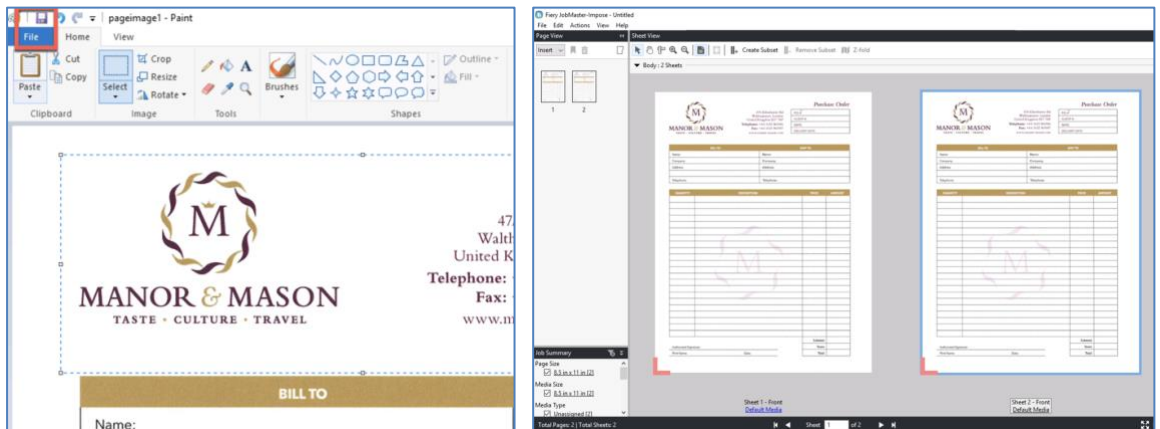

13. Close the document and **select page 2** in the Page View Window. Right click and in the drop-down menu select **Edit in Paint**.

14. In Microsoft Paint, select the **Paste** button in the toolbar. Move your placed logo and address to its final location and click off the selection.

15. Select the **Save** button in the top toolbar and your document will be saved directly back into JobMaster.
