

imagePRESS Server D3000

Fiery FS500 Pro

Get superior productivity and colour quality with innovative automation tools

Deliver faster processing speed, exceptional image quality, and higher productivity with imagePRESS Server D3000, driving the Canon imagePRESS V1000.

Boost productivity and profits

- Achieve uninterrupted production with Fiery HyperRIP, a speed-enhancing technology that processes jobs simultaneously for faster throughput.
- Save production time with built-in Fiery JobExpert that analyzes print files and dynamically choose the optimal colour settings for a perfect output on the first try.
- Increase efficiency with automation benefits from the free, browser-based Fiery JobFlow™ Base.

Maximum colour quality and consistency

The suite of fully integrated and automated colour management tools help you keep incredible and consistent print quality at all times. Even inexperienced operators can get stunning and accurate colours. This new and unique set of automated colour features includes:

- o 1-step color management — Get all media ready for production easily and automatically with combined calibration and profiling in a single action, directly from Fiery Command WorkStation®.
- o Zero-touch recalibration — Eliminate “out-of-date colour” with automatic, definable calibration schedules, without interrupting print production.
- o Spot Pro optimization — Optimise an entire spot colour library, or just a handful of selected colours “hands free,” using the Canon inline measurement instrument — leaving operators free to concentrate on other tasks.
- o Colour profile use tracking — Keep track of profile use and troubleshoot colour issues more easily.
