

## Pro Vehicle Outlines Graphics Solution Releases New Vehicle Template Library for 2023

**FREMONT, Calif.**, February 08, 2023 – Digital print server and workflow company [Fiery](#)® LLC has released new and updated vehicle templates for 2023 for its popular [Pro Vehicle Outlines](#) (PVO) product offering. PVO provides more than 19,500 precise vehicle templates hand-measured to within a quarter-inch accuracy, and the PVO template collection now includes new and redesigned models from major auto and truck manufacturers, such as the Ford Lightning, the GMC Sierra, the Ford F600, the Toyota Tundra, the Hyundai Ioniq 5, the Jeep Wagoneer and the Dodge Durango.

PVO templates are ideal for wrap design, as well as for creating accurate estimates and proofs. And, the [provehiclesoutlines.com](#) online subscription service delivers a more-convenient and cost-effective way to access the latest templates over time.

“Pro Vehicle Outlines’ templates are by far the most accurate templates we have used,” according to PVO user Greg Evanko, owner of Albuquerque, New Mexico-based [Genesis Signs](#). “Whether doing a full wrap or cut vinyl graphics, we always trust the accuracy of these templates. We have used others only to find they fall short of the quality provided by the PVO team. We are excited to start using the updated templates!”

### **Faster, easier template design with PVO online**

PVO’s online library, as well as its refreshed website and updated estore, make template access fast and easy. Once users select the right template, they can download, edit and design a wrap in their preferred illustration program. Used in conjunction with Fiery’s PVO WrapUp quote app, the website makes quoting and creating vehicle signs and wraps faster and more accurate than ever before.

“PVO has always offered a comprehensive selection of vehicle templates and we pride ourselves on staying up to date with new vehicle models,” said Mike Chramtchenko, director of new business development for Fiery. “The precision and comprehensive nature of our wrap software template offerings makes Fiery Pro Vehicle Outlines much more than a simple design library. Thanks to its ability to significantly streamline the estimating and design process, this is an indispensable production tool for any business that produces and installs vehicle and fleet graphics.”
