**OPTIMIZE YOUR DESIGNS AND
MAKE THE MOST OF THEM**

Inèdit Software

Experts in the textile industry

Inèdit Software are currently a gold standard company worldwide in our sector and we offer software solutions for digital printing, creative design and color management. At the same time, we help our clients optimize processes and integrate them efficiently in their digital workflow, due to our innovative image management tools and departmental interconnectivity.

In recent years, international acclaim of our products has spurred us to significantly expand our commercial horizons to reach clients from the textile, ceramic and laminate floor industries, from more than 60 countries, across five continents.

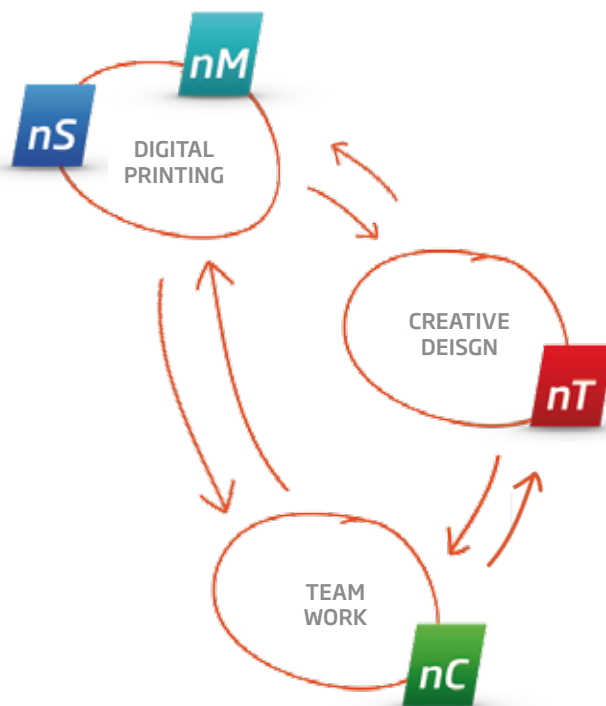

“More than 25 years creating digital solutions for the textile industry.”

WHY CHOOSE US?

We have more than 25 years of experience in the industry. We are experts in digital printing, design and color management for the textile and decorative industries. We like to work hand-in-hand with the customer to understand their needs and offer customized solutions.

INTEGRATED WORKFLOW

Our software solutions are interconnected and allow you to manage the digital textile workflow in the most efficient way and achieve maximum precision in the color management of your samples and productions.

We are color experts

Extensive network of distributors

We work all over the world

We create customized solutions

**MANAGES, ORGANIZES AND
SHARE YOUR DESIGNS
IN A FEW CLICKS**

With neoCatalog organize your designs, **prepare them and start selling**

Store and organize your designs

Centralize and organize your designs by creating custom galleries and share them online with customers and partners.

Create different colorways

Upload your designs and generate color variants in a few minutes, randomly or to your choice.

Create simulations photorealistic

Show your designs in real environments, such as dresses, sofas, cushions, etc. saving time and money.

Panel integrated in Adobe Photoshop

Upload your designs directly from Adobe Photoshop®. Finish them and save them directly in your catalogue.

Search by keywords

Efficiently organize your designs by keywords. Find what you're looking for in seconds.

nC for iPad&iPhone

Download the neoCatalog app on our website and manage your catalog from your iPhone or iPad.

Print directly your designs

Link neoCatalog with the Rip Software neoStampa and print your designs directly without having to move from your workplace.

Control privileges

The administrator has control over user access privileges. You decide who accesses your catalog, which galleries you share and with what level of permissions.

We are with you in all the process

We share our experience with our clients

01. Consulting

We put at your disposal the knowledge and experience accumulated for more than 25 years developing successful solutions for the textile and decorative design industry. We help you optimize processes by implementing our solutions in your workflow or by designing a new one that is more efficient and totally customized for you.

02. Training

We offer you the training you need to get the most of our software. We have 2 types of customized technical training so you can choose the one that best suits your needs. In your home or ours. You decide.

03. Technic & Support

In Inèdit Software we have a technical team specialized in each of our tools. In case of doubts or repairs our technicians are available to connect remotely to your computer or, if necessary, move to your facilities.

04. Customized Solutions

Inèdit Software's tools are interconnected between them making possible to create customized solutions for the different workflows that exist in the sector. We help you manage the entire process of design and digital textile printing and create custom software if you need.
