ColorPASS-GX400

for the Canon imageRUNNER ADVANCE C9280 PRO/C9270 PRO/C7270/C7260/C5255

Boundless productivity. Advanced capabilities.

Your print production business faces many challenges — high work volumes, tight deadlines, employees with different skill levels and customers who demand perfect color. The high-performance Fiery® ColorPASS-GX400 server is an easy-to-use raster image processor (RIP) that allows you to produce professional-looking finished jobs that win new business and get you noticed.

Increases Your Profits by Boosting Productivity

The powerful ColorPASS-GX400 architecture helps you meet tight deadlines, even for complex jobs. It reduces RIP bottlenecks, so the output gets to the printer quickly and help save you precious time.

Produces Consistent and Accurate Color

Your customers expect accurate color every time, no matter how difficult the job. The ColorPASS-GX400 helps you achieve precise color with integrated tools that can be used by employees at all skill levels.

- Fiery ColorWise® color management technology gives you great color control and extensibility out of the box.
- The new Image Enhance Visual Editor enables customers to make on-the-fly corrections for individual images without the need to go back to the original design files.

Integrates Your Solutions and Works Across Platforms

The ColorPASS-GX400 seamlessly integrates with your existing environment, third-party software and other EFI™ solutions to:

- Connect your digital, offset and business-management workflows to help save you the time and trouble of fixing technical issues.
- Support Windows® and Macintosh clients through the Fiery Command WorkStation®.
- Support the Adobe® PDF Print Engine v2 for native end-to-end PDF workflow — improving consistency and flexibility from design to print.

Offers the Ultimate Control Over Job Management

The ColorPASS-GX400 comes with powerful management tools and the flexibility to re-prioritize last-minute job changes with minimal interruption and downtime. These tools, together with the server's advanced queue management, help increase productivity and profitability.

An interactive visual user interface on the Fiery Command WorkStation makes it easy for administrators to monitor, control and troubleshoot production from multiple desktops, or locally at the Fiery server. Features such as Hot Folder and Virtual Printers automate repetitive tasks to reduce waste and errors. Make-ready tools and driver-based imposition speeds up the composition and imposition processes.

With personalized marketing services on the rise, the ColorPASS-GX400 server comes with flexible and scalable variable data printing tools. Its optimized tools work with all industry languages, including PPML, PDF/VT-1 and legacy languages. EFI's VDP applications accelerate the merging of variable and global objects and the processing of multiple images — all while driving maximum-speed output from your print engine.
