

Increase productivity and quality.

The Fiery® Productivity Package option for Fiery IC-416 embedded server includes a set of features essential for professional printing environments.

Image Enhance Visual Editor applies automatic enhancement to optimize image quality without going back to native applications.

- Automated job submission features for increased productivity
- Advanced queue management controls to manage print priorities without disrupting production
- Time- and cost-saving customized print settings for easy "File-Print" document printing
- Powerful softproofing and color management tools to minimize errors and waste
- Image and color quality adjustment tools for last-minute image editing, right in Fiery Command WorkStation®
- JDF technology to automate and integrate business and print processes for higher efficiency and increased profit
- Workflow automation solution for production of ready-to-print files with the fewest touch points and least potential for human errors

What's included

Here is the set of features included in the optional Fiery Productivity Package for Fiery IC-416.

FEATURE	DESCRIPTION
Fiery Hot Folders	Automates the job submission process and batch processing of multiple files with the same print settings
Graphic arts filters for Hot Folders	Automates job submission through Hot Folders for graphic arts file formats
Fiery Virtual Printers	Configures specific "File-Print" submission process for an output device so users don't have to specify print settings for multiple jobs
Print/Process Next	Lets the operator pick the next job to process or print immediately after the current job
Fiery Image Enhance Visual Editor	Adjusts individual images for brightness, contrast, highlights, shadows, color balance, and sharpness without opening and editing the file in the originating application
Fiery ImageViewer	Enables the user to visually check the final processed job before printing and apply color adjustments
Postflight report	Delivers color-coded job diagnostic reports to quickly and easily identify potential printing issues such as mixed source colors and missing spot colors
Control bar	Provides color quality control by placing the Ugra/Fogra Media Wedge, an industry-standard color bar, and job settings on every printed page
Configurable auto trapping	Controls trapping parameters and corrects misregistration in composite or separated documents
Paper simulation	Achieves accurate output simulations for special media by manually adjusting the hue, brightness, and saturation of the paper substrate being simulated
Fiery JDF	Enables built-in JDF-based integration support to automate processes from job submission to output by integrating print workflow and business management systems so that job information can flow through the systems with less touch points and errors
Fiery JobFlow	Automates job preparation steps to increase productivity by eliminating bottlenecks, reducing repetitive work, and minimizing touch points. Comes in two versions. Enable JobFlow Base (free) with the paid Fiery Productivity Package. Upgrade available to the full JobFlow version to expand workflow functionality

EFI fuels success.

From Fiery to superwide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi.com or call 650-357-3500 for more information.
