Crocus vernus, Pickwick	60862	Lavender with purple stripes	Bulbs	30	\$14.99
Crocus vernus, Pickwick	70486	Lavender with purple stripes	Bulbs	45	\$20.99

FS200 How to: Convert pages to grayscale

Feature overview

The Convert to Grayscale feature in Fiery® Compose and Fiery® JobMaster allows operators to easily specify any page or sheet surface to print in black and white during the makeready stage, saving click charges.

Objectives

- Convert pages to grayscale

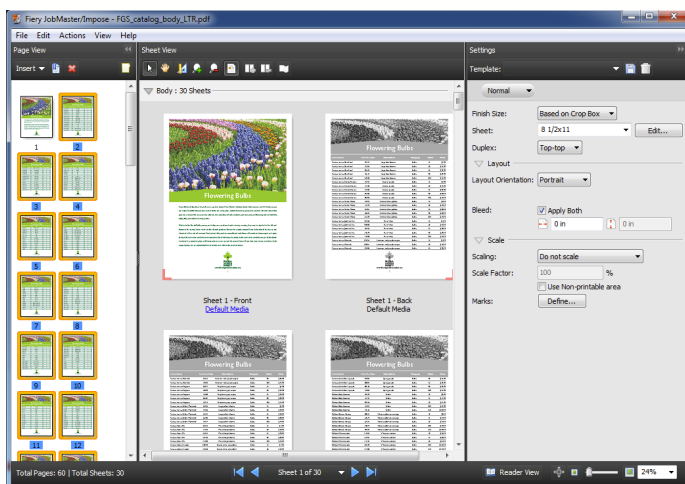

Additional resources

For additional software downloads, training resources and more, go to [Fiery Online Resources](http://www.efi.com/products/fiery-servers-and-software/fiery-workflow-suite/fiery-jobmaster/overview/).

Before you begin

- Open Fiery Command WorkStation® 5.7 or later and connect to at least one Fiery server running Fiery FS200/FS200 Pro.
- Activate the Fiery JobMaster¹ or Fiery Compose license on the computer running Command WorkStation.
- Place the file, **FGS_catalog_body_LTR.pdf** or **FGS_catalog_body_A4.pdf**, in the Fiery server Hold queue. Drag the file to the Command WorkStation Held list or use the Command WorkStation Import menu option.

¹To check to see if your Fiery Driven™ printer supports Fiery JobMaster, go to <http://www.efi.com/products/fiery-servers-and-software/fiery-workflow-suite/fiery-jobmaster/overview/>

Convert pages to grayscale

1. Select the **FGS_catalog_body_LTR.pdf** or **FGS_catalog_body_A4.pdf** file in the Held list. Then right-click and select either **JobMaster** or **Compose**.
2. In the JobMaster window, select all pages in either the Page View or Sheet View pane by right-clicking and select **Select All**. Or click **Edit > Select All**.
3. Hold the **Ctrl** or **Command** key and deselect pages **1**, **16**, **31**, and **46**.
4. Right-click on the highlighted pages and select **Convert to Grayscale**. Or click **Actions > Convert to Grayscale**.
5. This updates the pages in the Sheet View pane to show which sheets will print in color and which will print in grayscale.

Grayscale conversion takes place either in the Page View or Sheet View panels. Once the selected pages or sheet surfaces are converted, changes are reflected in the Sheet View panel.

If you use Fiery Impose to convert pages to grayscale, the grayscale settings are not saved in Fiery Impose templates.

6. Click **File > Save**.
7. **Save** as a regular job and then click **OK**.
8. Click **File > Exit** to close JobMaster. Or click the red **X** in the corner.

EFI fuels success.

From Fiery to super wide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi.com or call 650-357-3500 for more information.
