Maximise your value with Fiery technology

As a government in-plant shop, your organisation always wants better, faster, and cheaper services. So you need ways to continuously reduce costs by increasing efficiency to stay competitive with private sector services.

Fiery technology increases productivity

Innovative Fiery® digital front ends (DFEs) and workflow solutions can help you provide a far better level of service, adding value to your organisation at a much lower cost with:
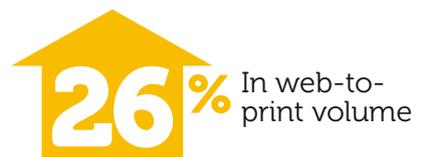

- Workflow automation for higher efficiency, lower cost, and faster turnaround times to serve customers quickly

- Easy reprints for government publications, certificates, financial and budgetary reports, meeting minutes, parliamentary briefs, stationary, forms, and promotional booklets

- Print processes that are accurate and secure

"Our Fiery workflow makes it easier to process files, and because of that we are now able to do time-sensitive work that we couldn't handle before."
Paul Sprow,
Manager,
Arlington County Digital Production and Mail Center

In-plant trends:

Over the next two years, in-plant printers will see growth* of:

96% In automated workflows

68% In variable data printing

26% In web-to-print volume

* Source: InfoTrends U.S. Production Software Investment Outlook, 2015

Fiery advantages

Increase productivity

The work of government is fuelled by time-sensitive documents, so processing speeds matter. Fiery DFEs with HyperRIP split files to process them simultaneously; they reach the print engine up to 55% faster and rapidly process variable data files.

Cut costs

Streamline and automate workflows with Fiery Workflow Suite products. Manage print jobs and all Fiery Driven™ printers from Fiery Command WorkStation®. Minimise print errors and waste with real-time previews. Deliver exceptional quality automatically with state-of-the-art Fiery imaging and colour technology.

Make job submission more convenient

EFI Digital StoreFront® lets users quickly and easily identify, customise, and securely order documents. Automated job submission to the Fiery DFE delivers faster turnaround time, lowers labour cost, and reduces errors.

Speed return on investment

Teach your employees to use Fiery DFE capabilities to the fullest to maximise return on your equipment investment with the Fiery Professional Certification programme. This commitment to employee development can also increase employee loyalty and job retention.

Call for a Fiery demo today

EFI works closely with leading print engine manufacturers and dealers to provide integrated printing solutions, services, and support worldwide. Ask for a demo to see how EFI products can improve your productivity.

Fiery digital front ends provide:

- Job, colour, and media management
- Workflow and job automation
- Preflight and softproof
- Document makeready
- Variable data processing
- Finishing support
- MIS/Web-to-Print integration
