

Increase productivity and quality.

The Fiery® Productivity Package option for the embedded Fiery E-23C includes a set of features essential for professional printing environments.

- Automated job submission features for increased productivity
- Advanced queue management controls to manage print priorities without disrupting production
- Image and colour quality adjustment tools for last-minute image editing, right in Fiery Command WorkStation®
- Spot colour editing for accurate reproduction of brand colours
- Workflow automation solution for production of ready-to-print files with the fewest touch points and least potential for human errors
- Powerful softproofing and colour management tools to minimise errors and waste
- JDF technology to automate and integrate business and print processes for higher efficiency and increased profit

What's included

Here is the set of features included in the optional Fiery Productivity Package for Fiery E-23C.

| FEATURE | DESCRIPTION |
|--------------------------------------|---|
| Fiery Hot Folders | Automates the job submission process and batch processing of multiple files with the same print settings |
| Graphic arts filters for Hot Folders | Automates job submission through Hot Folders for graphic arts file formats |
| Fiery Virtual Printers | Configures specific "File-Print" submission process for an output device so users don't have to specify print settings for multiple jobs |
| Schedule Print | Balances workload and prioritises print production to minimise production peaks and eliminate bottlenecks |
| Rush Print | Allows users to process and print an urgent job immediately, then resume the interrupted job without having to discard the previously printed portion |
| Print/Process Next | Lets the operator pick the next job to process or print immediately after the current job |
| Fiery Spot-On™ | Edits spot colour reference libraries or adjusts CMYK equivalents and RGB values for closer spot colour matching on specific engines or print substrates |
| Composite overprint for spot colours | Allows objects specified to correctly overprint in composite PostScript and PDF files |
| Fiery Image Enhance Visual Editor | Adjusts individual images for brightness, contrast, highlights, shadows, colour balance, and sharpness without opening and editing the file in the originating application |
| Fiery ImageViewer | Enables the user to visually check the final processed job before printing and apply colour adjustments |
| Postflight report | Delivers colour-coded job diagnostic reports to quickly and easily identify potential printing issues such as mixed source colours and missing spot colours |
| Control bar | Provides colour quality control by placing the Ugra/Fogra Media Wedge, an industry-standard colour bar, and job settings on every printed page |
| Configurable auto trapping | Controls trapping parameters and corrects misregistration in composite or separated documents |
| Paper simulation | Achieves accurate output simulations for special media by manually adjusting the hue, brightness, and saturation of the paper substrate being simulated |
| Fiery JDF | Enables built-in JDF-based integration support to automate processes from job submission to output by integrating print workflow and business management systems so that job information can flow through the systems with less touch points and errors |
| Fiery JobFlow™ | Automates job preparation steps to increase productivity by eliminating bottlenecks, reducing repetitive work, and minimising touch points. Comes in two versions. Enable JobFlow Base (free) with the paid Fiery Productivity Package. Upgrade available to the full JobFlow version to expand workflow functionality. |

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalised documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity. Visit www.efi.com or call 0808 101 3484 (UK only) or +44 (0)1246 298000 for more information.

Nothing herein should be construed as a warranty in addition to the express warranty statement provided with EFI products and services.
